

Chocolate

made by Victoria Svischova

Introduction

Chocolate is sweet...

Chocolate is delicious...

People all over the world are fond of it.

But what do we really know about chocolate?

History of chocolate.

Long before the discovery of America by Europeans Aztecs knew how to prepare chocolate. It was a bitter drink, which was cooked from roasted cocoa beans with spices. It could afford only the rich, because This drink was sacred. The Spaniards tried chocolate in the New World in the late fifteenth century. "The drink of the gods" had little in common with the well-known to us modern hot chocolate, so the conquistadors found it tasty!

The description of the cacao tree.

The Cacao Tree is a shade tolerant, moisture loving, understory rainforest tree. It naturally favors riparian zones so often in the wild is found along rivers. The trees live for up to 100 years, but cultivated trees are considered economically productive for only about 60 years.
