

# Aggregate Demand and Aggregate Supply

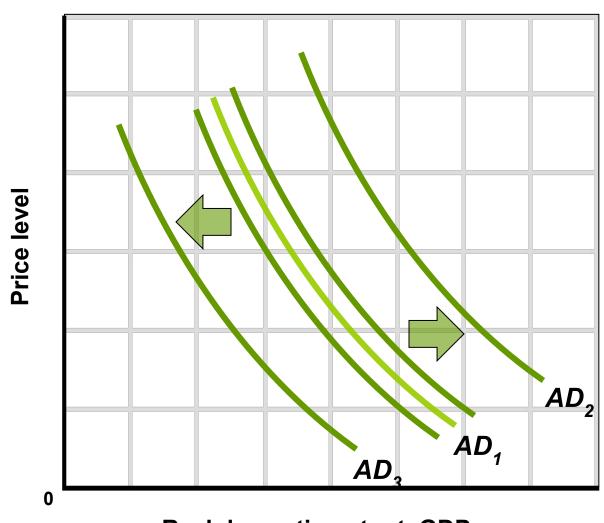

## **Aggregate Demand**

- Real GDP desired at each price level
- Inverse relationship
  - Real balances effect
  - Interest effect
  - Foreign purchases effect

# **Aggregate Demand**

# **Changes in Aggregate Demand**

Real domestic output, GDP

# **Consumer Spending**

- Consumer wealth
- Household borrowing
- Consumer expectations
- Personal taxes

L01

## **Investment Spending**

- Real interest rates
- Expected returns
  - Expectations about future business conditions
  - Technology
  - Degree of excess capacity
  - Business taxes

# **Government Spending**

- Government spending increases
  - Aggregate demand increases (as long as interest rates and tax rates do not change)
  - More transportation projects
- Government spending decreases
  - Aggregate demand decreases
  - Less military spending

# **Net Export Spending**

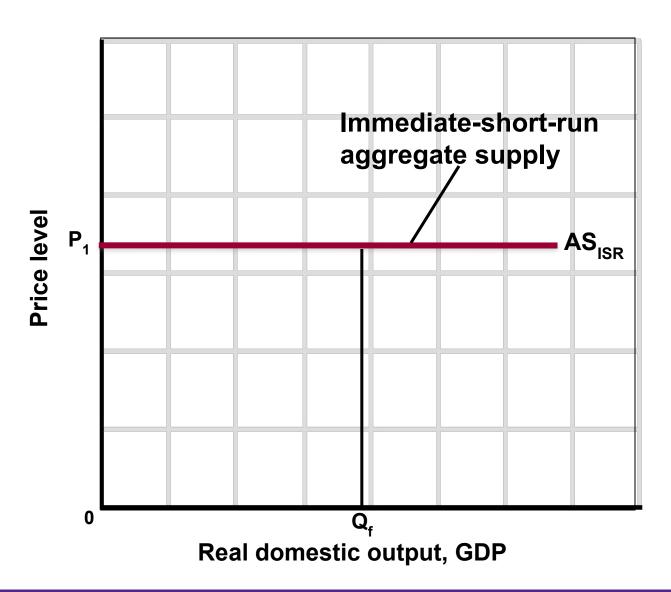

- National income abroad
- Exchange rates
  - Dollar depreciation
  - Dollar appreciation

## **Aggregate Supply**

- Total real output produced at each price level
- Relationship depends on time horizon
  - Immediate short run
  - Short run
  - Long run

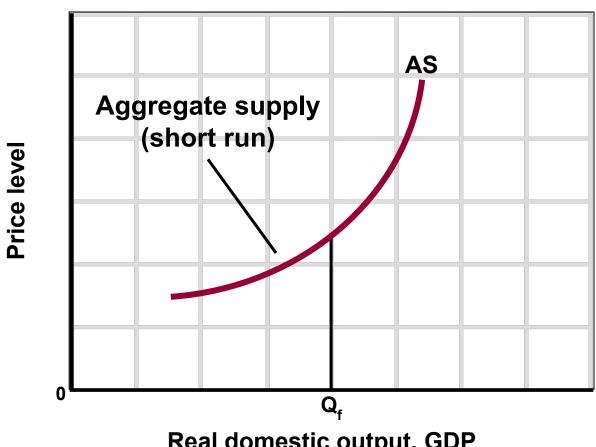

LO<sub>2</sub>

#### **AS: Immediate Short Run**

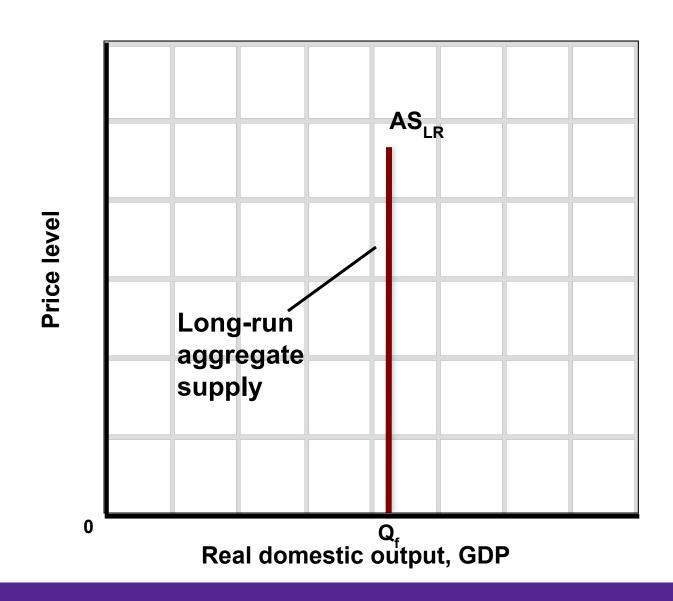

LO2 29-1

# **Aggregate Supply: Short Run**

Real domestic output, GDP

# **Aggregate Supply: Long Run**

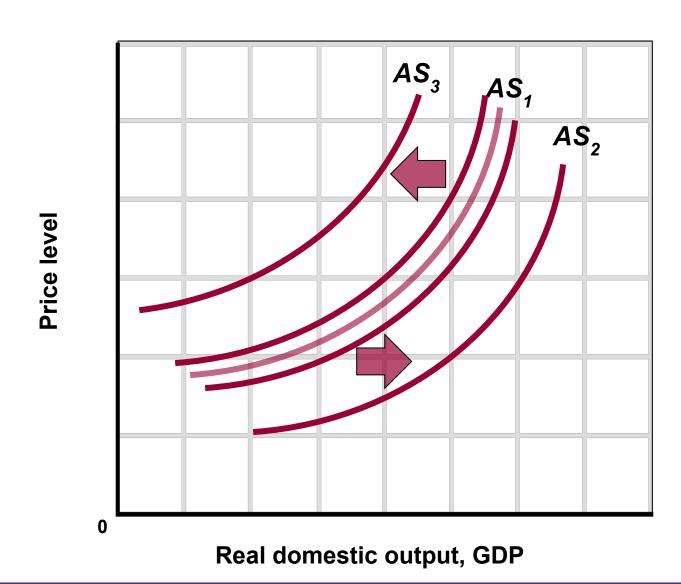

# Changes in Aggregate Supply

- Determinants of aggregate supply
  - Shift factors
- Collectively position the AS curve
- Changes raise or lower per-unit production costs

LO2 29-1

# **Changes in Aggregate Supply**

LO<sub>2</sub>

## **Input Prices**

- Domestic resource prices
  - Labor
  - Capital
  - Land
- Prices of imported resources
  - Imported oil
  - Exchange rates

#### **Productivity**

- Real output per unit of input
  - Increases in productivity reduce costs
  - Decreases in productivity increase
    costs
    total output

total inputs

Per-unit production cost 
$$=$$
  $\frac{\text{total input cost}}{\text{total output}}$ 

#### Legal-Institutional Environment

- Legal changes alter per-unit costs of output
  - Taxes and subsidies
  - Extent of government regulation

# Equilibrium

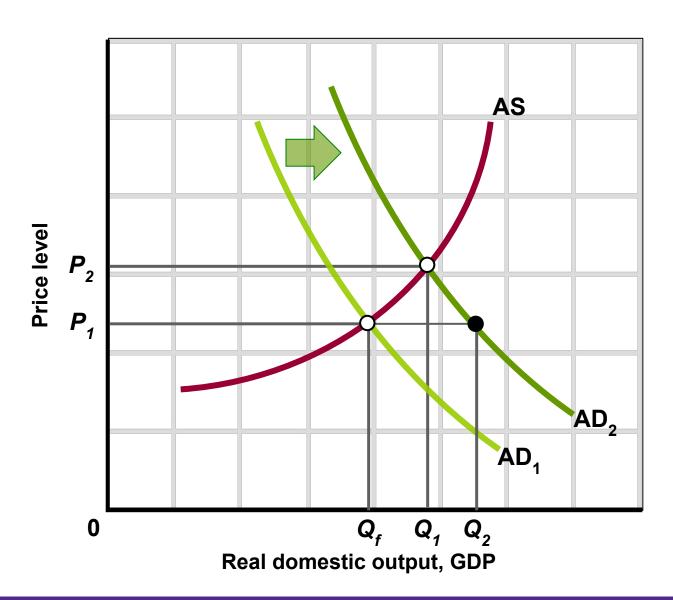

Real Output Demanded (Billions)	Price Level (Index Number)	Real Output Supplied (Billions)
\$506	108	\$513
508	104	512
510	100	510
512	96	507
514	92	502

Real domestic output, GDP (billions of dollars)
