- **Severe droughts, floods and cyclones happen very often on the continent. The people suffer from limited fresh water.**

- The tropical forests are displaced by savanna or grassland. In the south-east and on the sides of the mountains there are forests of eucalyptus and other evergreen trees.

WILD LIFE OF AUSTRALIA

THE STRANGE WORLD OF AUSTRALIAN ANIMALS

Australia has been called “the land of differences” and “the continent of contrasts”. There are many ways in which it is different from other countries. The first thing most people think of are the strange native animals

There are many wild animals in Australia. Some of them, such as

the kangaroo

the koala

**the dingo
or wild
dog**

are not found in
any other country
of the world

The native birds of Australia are very interesting. The emu, for example, which with kangaroo is represented on the Australian coat-of-arms, is the next-tallest bird in the world after the ostrich.
