

Education in **CANADA**

The school system of Canada is very much like the one in the USA, but there are certain differences.

Education in Canada is general and compulsory for children from 6 to 16 years old, and in some provinces — to 14. It is within the competence of the local authorities, and therefore it may differ from province to province. For example, Newfoundland has an 11-grade system. Some other provinces have 12-grade systems, and Ontario has even a 13-grade system. Grades 1—6 are usually elementary schools, and grades 7—12 are secondary schools.

In some provinces there is a kindergarten year before the first grade. Elementary education is general and basic, but in the junior high school years the students can select some courses themselves.

Most secondary schools provide programmes for all types of students. Some of them prepare students for continuing their studies at the university. Vocational schools are separate institutions for those who will not continue their education after secondary schools. There also exist some commercial high schools. Some provinces have private kindergartens and nursery schools for children of pre-elementary age. There also exist *Roman Catholic schools* and private schools in some provinces. In most provinces private schools receive some form of public support.

Colleges

Admission to the university in Canada is after high school with specific courses. Getting a degree in law, medicine, dentistry or engineering usually takes 3—4 years of studying. University tuition fees vary among different provinces. All provinces also have public non-university institutions. They are regional colleges, institutes of technology, institutes of applied arts, colleges of agricultural technology and others. Criteria for admission to these institutions are less strict.

Institute of applied arts

Regional college

Institute of technology

The history of education in Canada, as in other Western countries, has involved the growth of formal instruction funded by taxes and supervised by the state. This growth resulted from concern about cultural, moral and political behaviour, the emergence of a wage-labour economy, changing concepts of childhood and the family, and the general reorganization of society into institutions.

By the late 20th century, schooling had become part of an institutional network which included hospitals, businesses, prisons, and welfare agencies. Various groups experienced this development in different ways, sometimes by official design and sometimes by their own choice. As a result, there are many histories of Canadian education and important distinctions within the general trends.

The education system in Canada encompasses both publicly-funded and private schools, including: community colleges/ technical institutes, career colleges, language schools, secondary schools, summer camps, universities and university colleges.

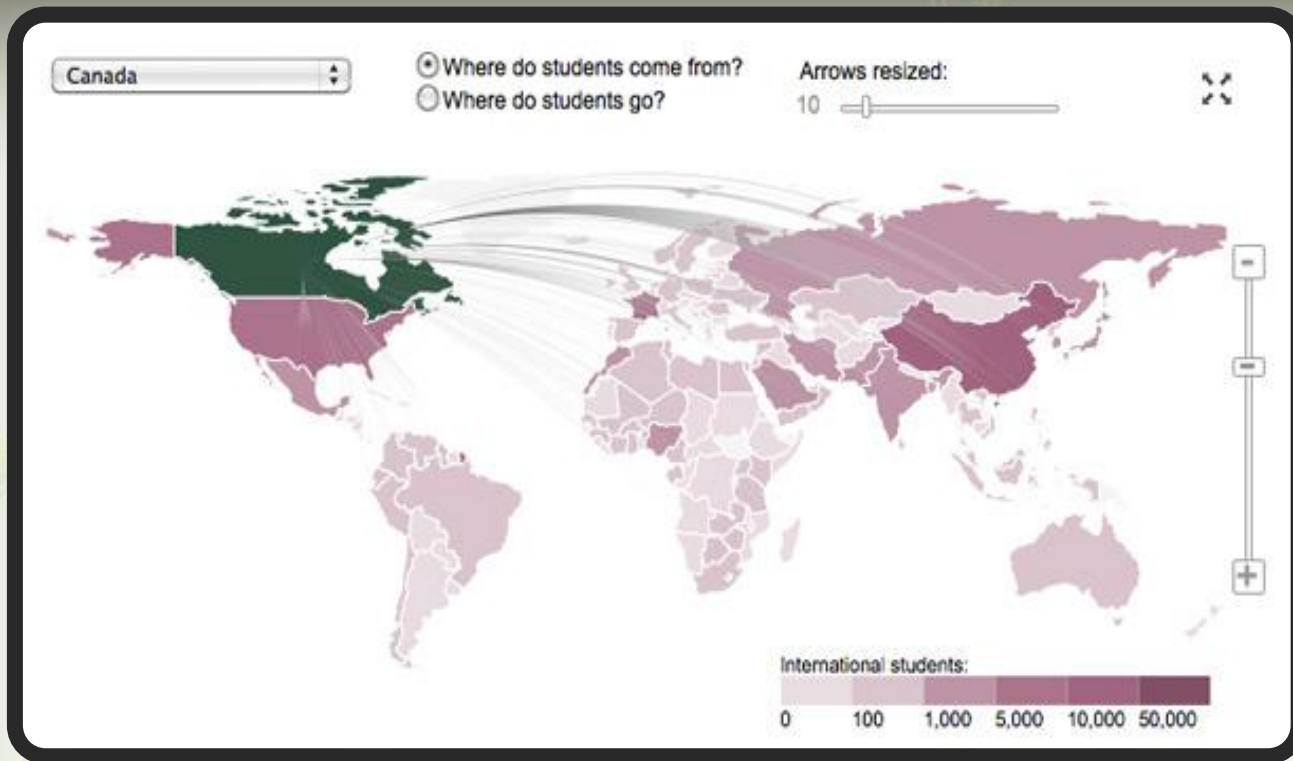

Education is a provincial responsibility under the Canadian constitution, which means there are significant differences between the education systems of the different provinces. However, education is important to Canadians, and standards across the country are uniformly high.

A world map with a light blue background. The map is stylized with a grid pattern. Three countries are highlighted: Canada in red, the United States in green, and Australia in dark grey. Other countries are shown in a light blue color.

The Most Educated Countries in the World

Every year almost 150,000 international students come to Canada to pursue one or another higher study program. They come from nations all over the globe to pursue an education at Canadian high-schools, colleges and universities. Canadian place great importance on learning, and have developed a first-rate education system with very high standards.

As you can see, many people from China, Russia, USA and France move to Canada with the certain goal – to study in the most popular high colleges, because without good schooling none of your everlasting dreams can be fulfilled.

Students came in this country from all over the world to pursue undergraduate and postgraduate courses. Some of the famous courses in Canada are language, fine arts, agriculture, mass communication, design, multimedia, journalism, engineering, business studies and management. If you are planning to study in Canada's top 10 colleges and universities, the below list will help you to select from among the best Canadian universities. These world-class institutions offer a wide range of programs to match student's academic and professional goals and interests.

1 Top 5 colleges in Canada:
