

The profession of a doctor

- There are many interesting and noble professions. I want to be a doctor. It is an interesting profession.

- I understand that it is necessary to study a lot to become a doctor.

- I also understand that this profession requires great responsibility because it deals with the most precious thing one has — with his health.

- We trust doctors the main what we have – our life and that's why a doctor must be qualified specialist. He must help people at any time of the day. A doctor can't make a mistake.

- A doctor always must worry about a health of his patient.

- So far I have not decided what kind of a doctor I want to be. Whether I once become a surgeon, pediatrician, or physician, all I know now is that I certainly want to become one of those people who are exalted by people for the job that they do.

- It can take years of studying, taking very expensive courses, getting a loan in the bank for the purpose of paying tuition, and going through many obstacles on the way to obtain a diploma of a qualified specialist. However, I believe that as long as it is what I set as my life's aim, I am able to fulfil my dream.
