

DEVELOPMENT OF HIGH-SPEED RAILWAYS IN RUSSIA

**Nasurullin Nail, S-115
Siberian Transport University**

The development of high-speed railways is a priority task that has been given transport industry by the Government of the Russian Federation.

Let us consider how the EU deal with the problem of high-speed railway transport development

The number of countries where passengers can travel by high-speed trains is now more than 12.

France, Spain, Germany, England, Italy have their own extensive systems of high-speed trains reaching their speed of 300 km ph

TGV and ICE trains

Eurostar Italia - the most famous
high speed railway train in EU

Russia's first high-speed train, the Sapsan

Russia is planning to build the line to Finland,
and the railroad from Moscow to Sochi by 2014

We hope that in the near future Russia will be on a level with the highest European standards
