

Our planet - Earth

“The world is a fine place
and worth fighting for”

- What are the global environmental problems?
- How we can protect our nature?
- What can we reduce, reuse, recycle?

Big or small

What do you do
to keep the Earth clean?

PEOPLE START POLLUTION. - PEOPLE CAN STOP IT.

1. What are ecological problems?
2. Are the seas in danger?
3. What is the problem of civilization?
4. What happens every 10 minutes?
5. Air pollution is a very serious problem, isn't it?
6. What makes the greenhouse effect?
7. What is the greater problem?
8. Do you think all states ought to save the Earth?

The pollution of the land.....

Ecological problems are.....

The seas.....

Every 10 minutes.....

Air pollution is.....

Plants and factories.....

The greater problem is.....

All states ought to.....

A group of approximately 15 fish of various species, including striped snappers and sea breams, are swimming in a circle around a central white banner. The background is clear, turquoise ocean water.
