

# Reproduction of the Inglehart-Welzel Cultural Map with Welzel's New Value Measures

## Country Distribution over the Map

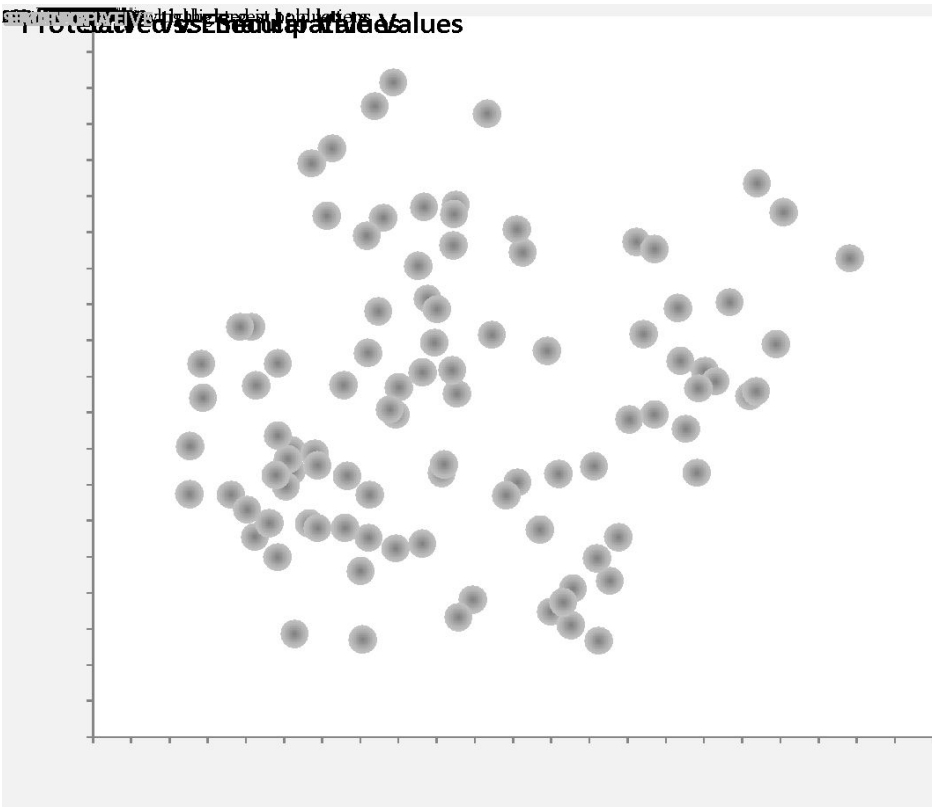

## Culture Zone Areas on the Map

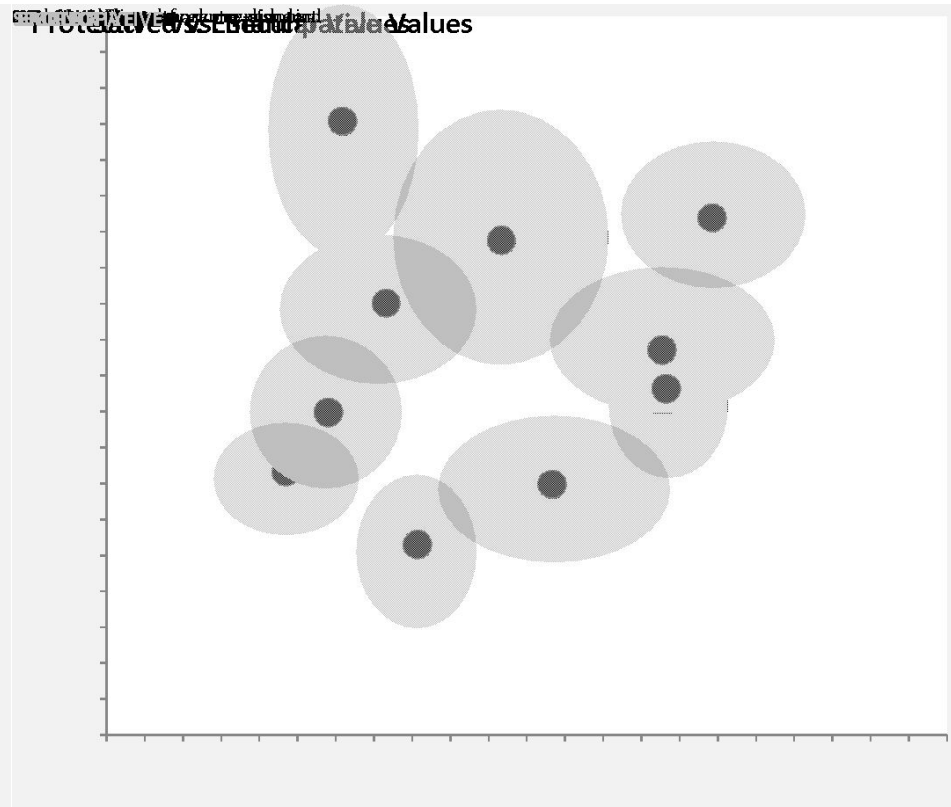

# Reproduction of the Inglehart-Welzel Cultural Map with Welzel's New Value Measures

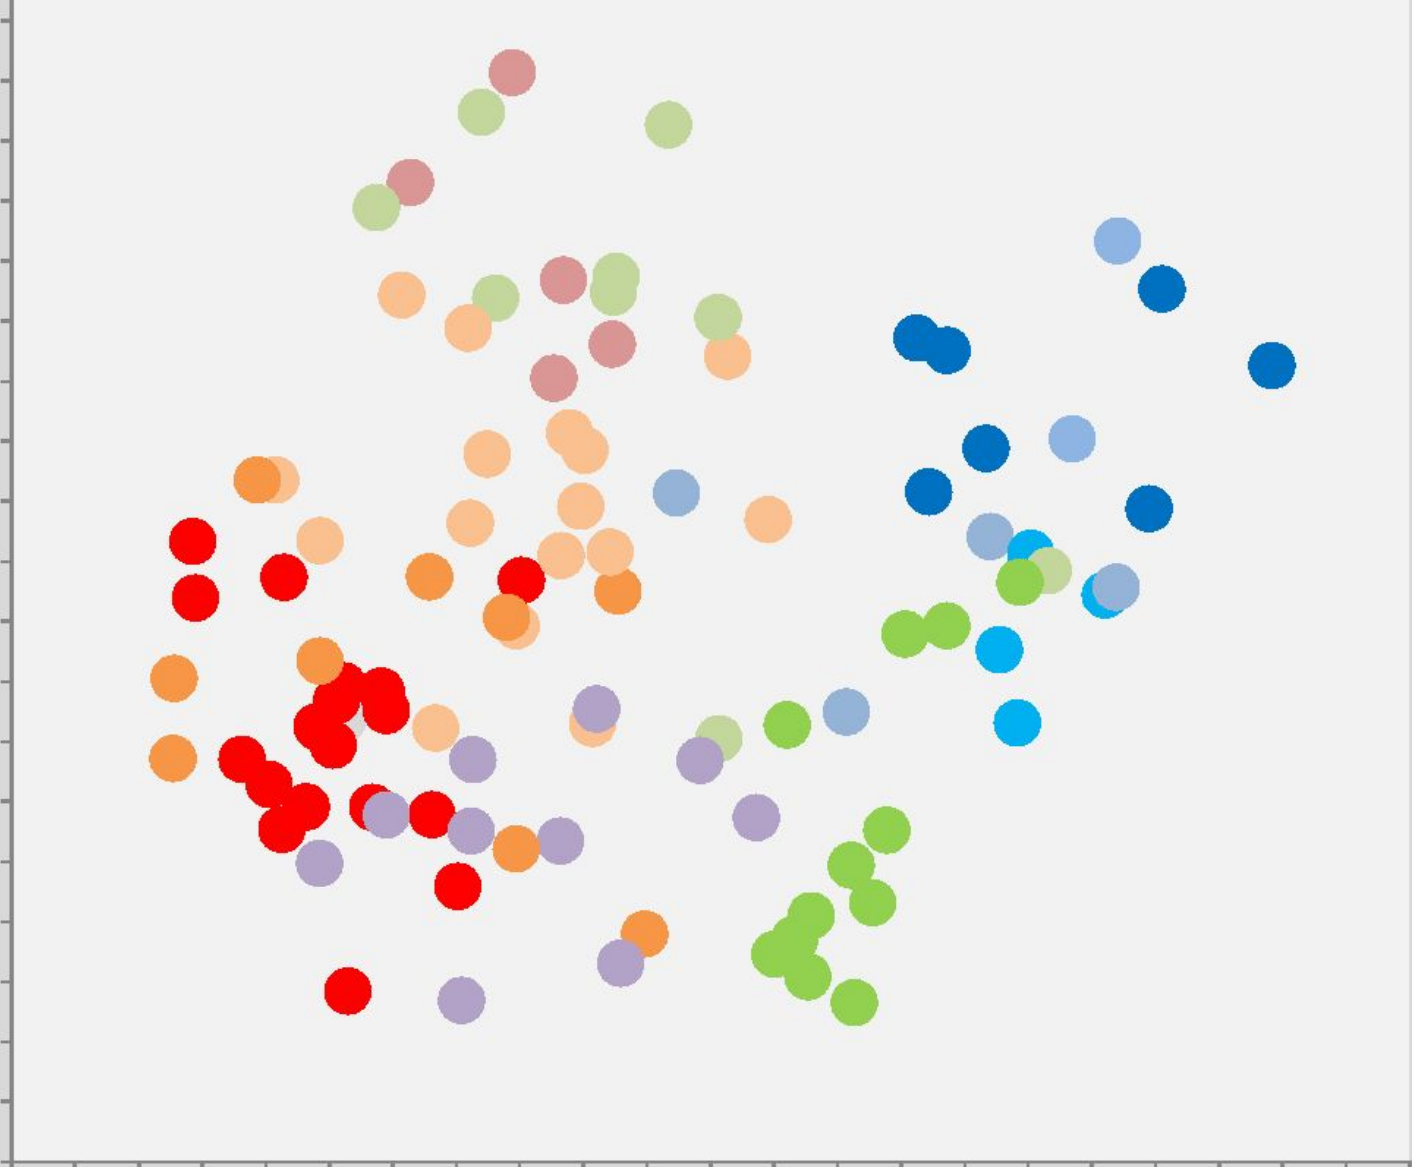

## Country Distribution over the Map

## Culture Zone Areas on the Map

# PCA of simulated parameters values

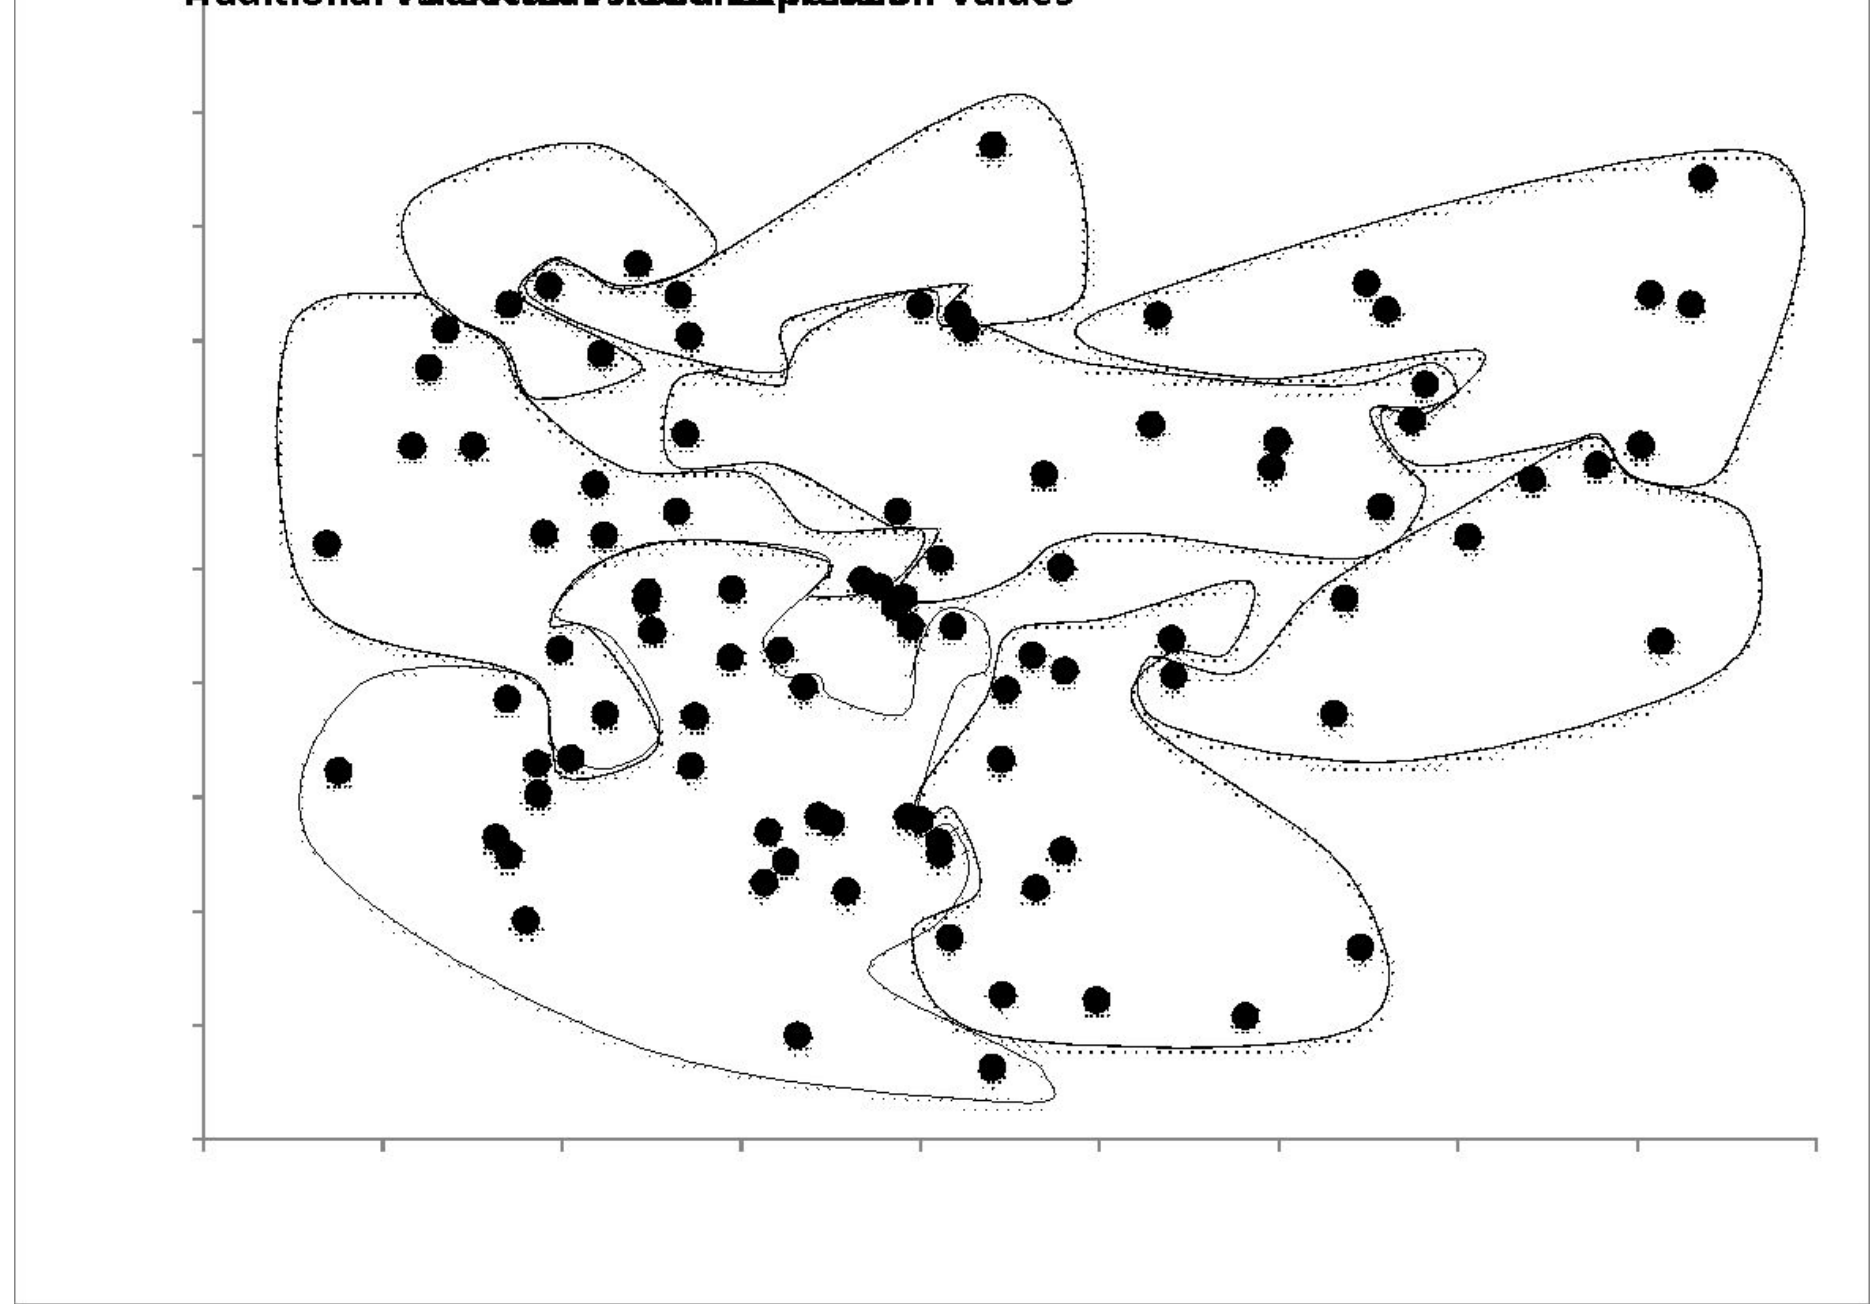

# 10 related SEB parameters values

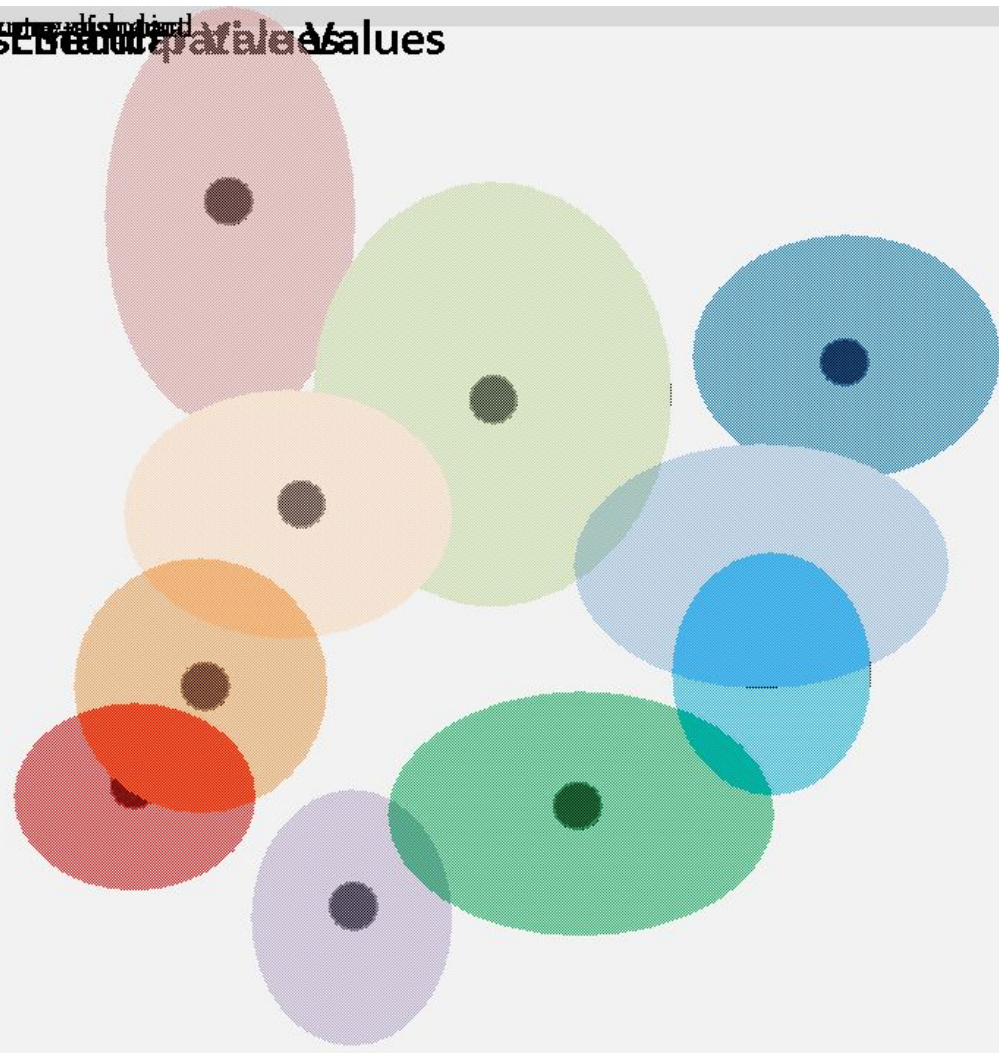

# Traditional vs. Subcultural - Self-Expression Values

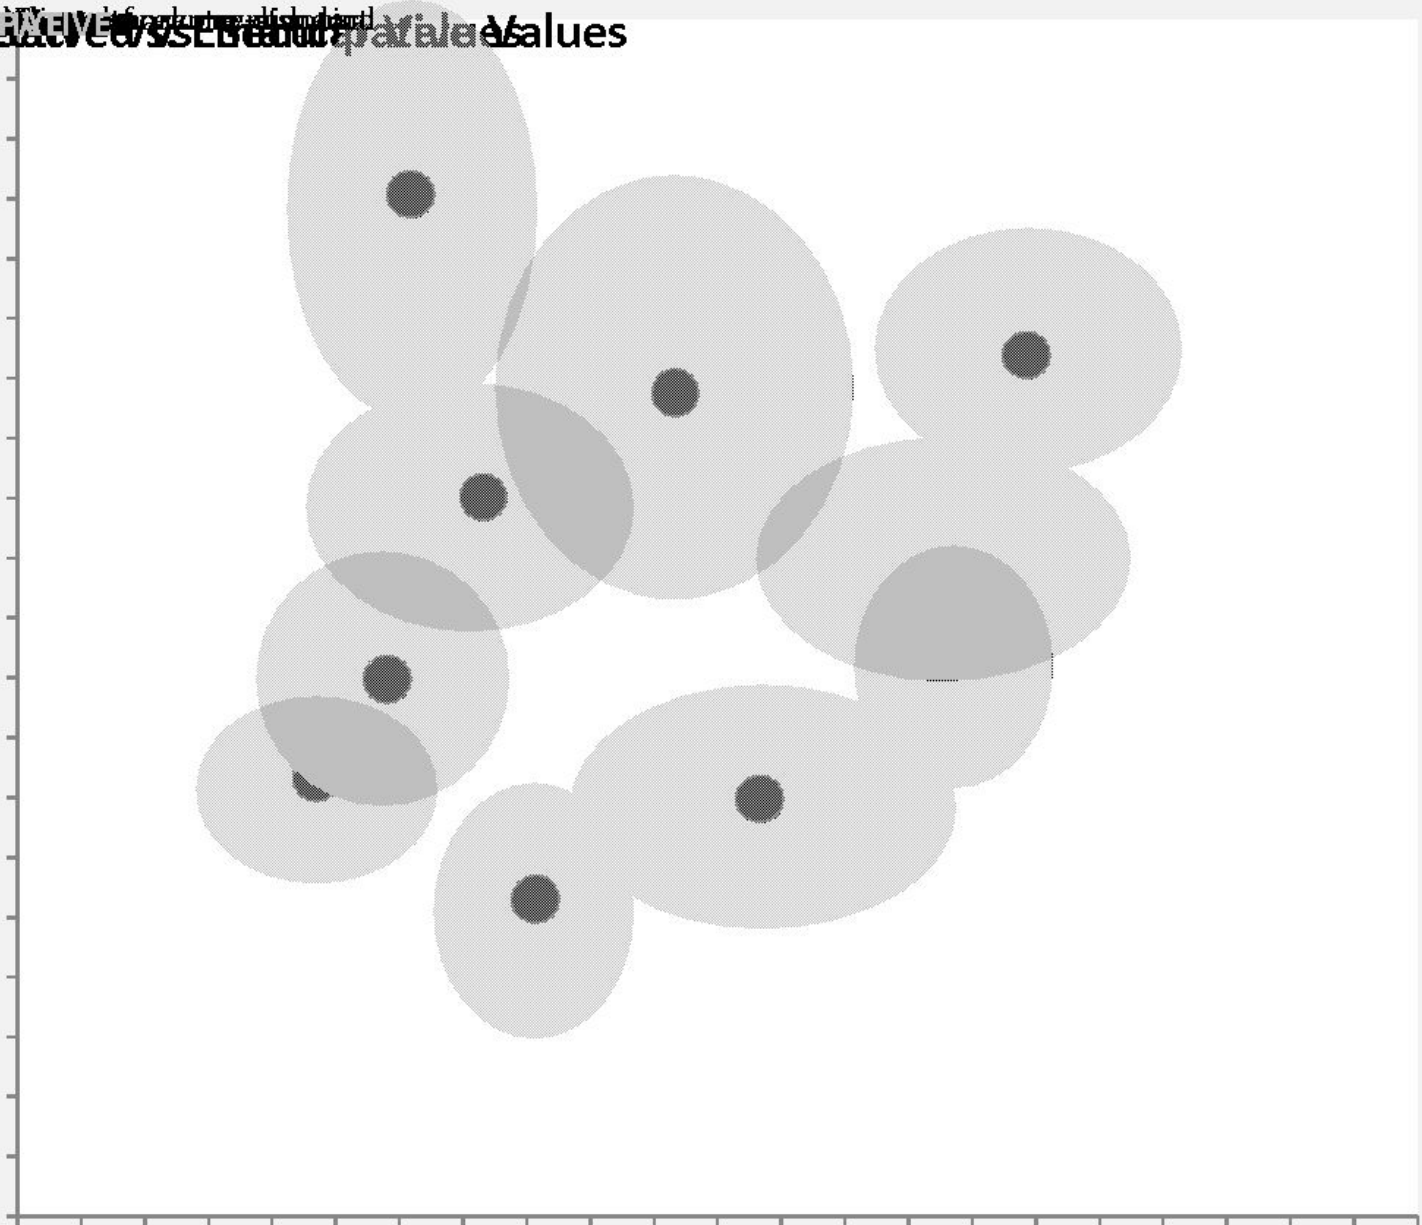

Asia

# PROSTATE CANCER SEVERITY RATING VALUES

# PROSTATECTOMY vs. Radical Prostatectomy Values

## NOTES:

*Culture Zone Classification:* The culture zone classification is a revised version of Inglehart and Welzel's (2005) earlier one, as documented in Welzel (2013: 25-33). *Islamic East:* Core Islamic countries of the MENA region; *Indic East:* countries in Southern Asia; *Sinic East:* countries in East Asia; *Orthodox East:* former parts of the Soviet Union; *Old West:* Western countries that were core parts of the Roman Empire; *Reformed West:* Western countries that were leading the Reformation; *New West:* overseas offshoots of Western Europe.

*Source:* Country scores obtained by factor-analyzing (Kaiser-criterion, varimax rotation) the "disbelief" and "defiance" components of Welzel's (2013: 63-73) Secular Values and the "choice" and "equality" components of his Emancipative Values on the country-aggregated, time-pooled data of WVS rounds 1 to 6. Data are included in the SPSS-file "Welzel WVS 1 to 6 Key Aggregates.sav" downloadable at this website (see variables "SVI-culmap" and "EVI-culmap"). Variables are documented in the PDF-file "Welzel Data Variable Descriptions."
