Stating Svobodi (English Statue of Liberty, full name - Freedom, illuminating the world, Eng. Liberty Enlightening the World) - one of the most famous sculptures in the US and in the world, often called "the symbol of New York and the USA", "a symbol of freedom and democracy", "Lady Liberty". This is a gift from French citizens for the centenary of the American Revolution.

The Statue of Liberty is located on Liberty Island (Eng. Liberty Island), about 3 km southwest of the southern tip of Manhattan, in New Jersey. Until 1956, the island was called “Bedlow Island” (English Bedloe’s Island), although it was popularly called the “Island of Freedom” from the beginning of the 20th century.

The goddess of freedom holds a torch in her right hand and a tablet in her left. The inscription on the tablet reads “English. JULY IV MDCCLXXVI ”(written in Roman numerals, date“ July 4, 1776 ”), this date is the day of the adoption of the United States Declaration of Independence. With one foot, “Freedom” stands on broken chains.

The total weight of copper used for casting the statue is 31 tons, and the total weight of its steel structure is 125 tons. The total weight of the concrete base is 27 thousand tons. The thickness of the copper coating statues - 2.57 mm.

The height from the ground to the tip of the torch is 93 meters, including the base and the pedestal.

The height of the statue itself, from the top of the pedestal to the torch is 46 meters.

The statue was built from thin sheets of copper minted in wooden forms. Formed sheets were then installed on a steel frame.

Creating a statue

The statue was commissioned by French sculptor Frederik Auguste Bartholdi. She thought as a gift for the centenary of the Declaration of Independence in 1876. According to one version, Bartholdi even had a French model: a beautiful, recently widowed Isabella Boyer, the wife of Isaac Singer, the creator and entrepreneur in the field of sewing machines.

Statue as a cultural monument
