

Karpogory

I will start with the fact, that my country very beautiful place.

The place where I live is quite popular and tourists often come here. There are many different attraction, parks and cultural monuments. The far North is famous for its natural beauty. It is very nice place.

During these 5 days of stay you should not waste time in vain. You must will go on all our museum and attractions. And I'll tell you where to go so you don't waste your time.

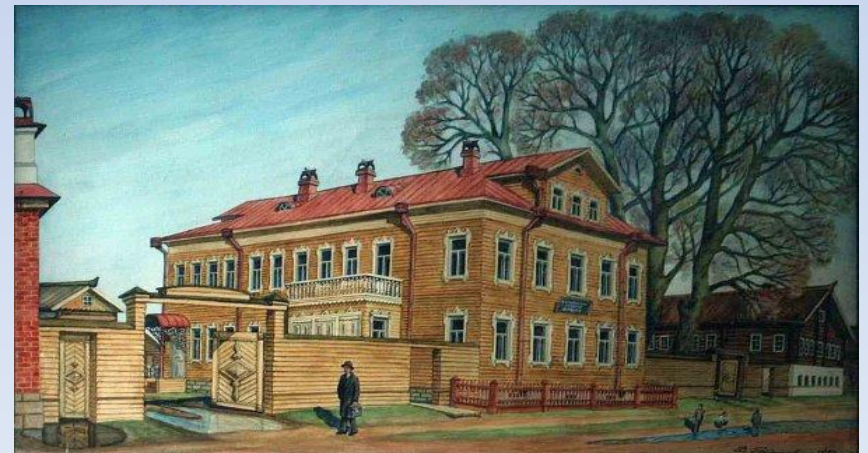

Street of the "wooden horses»

- First of all you need to visit Street of the "wooden horses»
- Karpogory is not the center of the architecture of the North: much has been lost due to decay, fires, alterations and repainting of houses. there are still a few echoes of the past — old houses — which are now worthy of the position of a Museum exhibit. On Abramov street there is a corner of the old building — the most beautiful place of the district center. A person who first came to the pinezhye will be surprised by the tranquility and beauty of the chopped houses.

The house of the merchant Shepotkina

- The building of the kindergarten "poplar" used to be an example of inequality in the carp Mountain. The house belonged to the merchant Grigory Stepanovich Shchepotkin and his wife Natalia Ivanovna. The solution of the house is unconventional for the village: inside on each floor along a large corridor with doors to spacious rooms. The house has several entrances. There used to be a residential part, and utility rooms were in neighboring buildings, the so-called human buildings located in the background.

House of folk art

- The house of folk art is one of the first in the Arkhangelsk region. Here everyone can master the skills of weaving, weaving belts, patchwork, carving and painting on wood. Works of masters are presented in many museums of Russia and abroad. An important part of the House's activities is the popularization of traditional Pinega crafts: for this purpose, stationary and mobile exhibitions are regularly held both inside and outside the district.

Victory monument

Monastery in Karpogory

The temple has become a real decoration of the whole area: it stands on a high basement, very elegant, looking up to 27 meters, topped with an octagon and a bell tower. Another building is being built next to the new Church. It will house a Sunday school and cells, which will be able to stop pilgrims traveling to the monastery. Now the divine Liturgy is served two or three times a week at the farmstead

- There are many shortcomings in my village. For example, the summer here is very short and very bad roads. I hope you will remember this visit and despite all the cons you will come to us again.
