# "Ak Bars Info" recalls the most interesting quotes of Artem Lukoyanov from interviews of different years.

- ▶ [I came to hockey in 10 years.] Initially, I was engaged in football, and then the coach came and called for hockey, but at first I combined both classes. Then, when I was a little older, I rebuilt myself and spent all my time on hockey. It was hard, because at that time the problems were with the form, parents from somewhere they delivered it, happened, even played other people's clubs, took it for a while. But the fact that I came to hockey so late does not mean anything. If you start studying at five, it does not mean that you will become Datsyuk
