

# Water pollution

*Petroleum products are the most dangerous problem of the World Ocean.*

*There are about 2000 drilled oil wells in the oceans*

*Oil pollution cause very terrible damage to the nature.*

*Rare species of fishes, mollusks  
and algae disappears.*

*Oil is not soluble in water, it's a huge problem.*

*In the beginning, oil spots are in surface of water.*

*Then oil settles to the bottom  
and stays there forever.*
