# IPHONE X- SAY HELLO TO THE FUTURE

iPhone x - in the truest sense of the word smartphone of the future. 10 years later adaptations of this device, the company has managed to achieve the ideal.

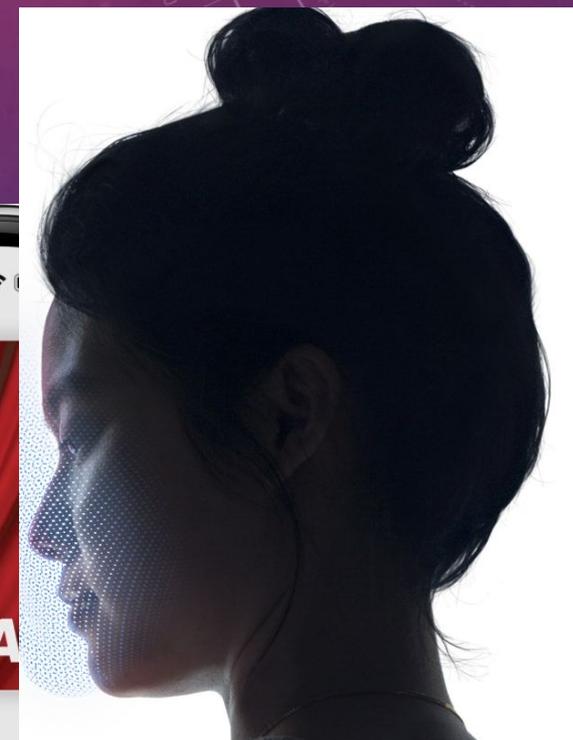

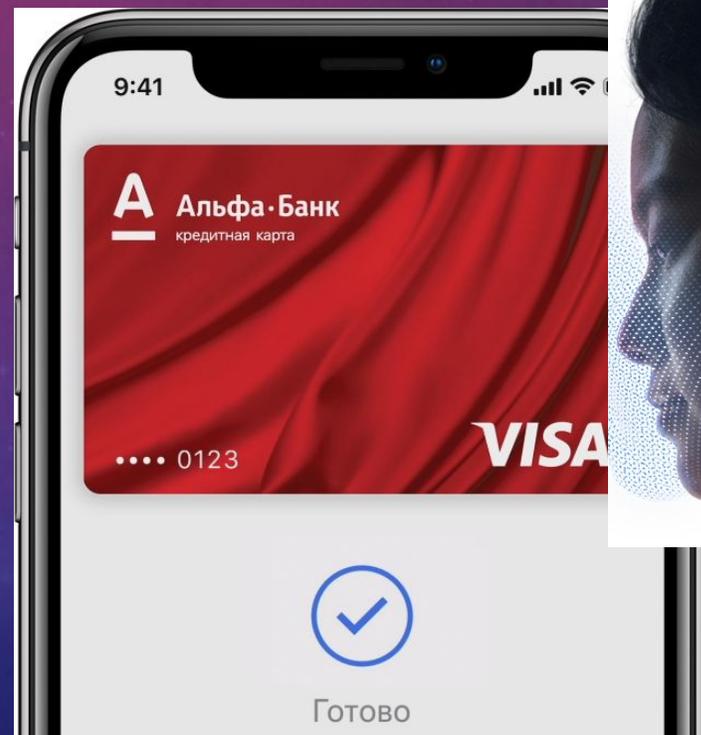

# DISPLAY OF IPHONE X

This gadget is now a brand new display "Super retina", is the first OLED display that meet the highest standards of iPhone. In the so-called "monobrow" are hidden all the advanced technologies and capabilities, including Face ID.

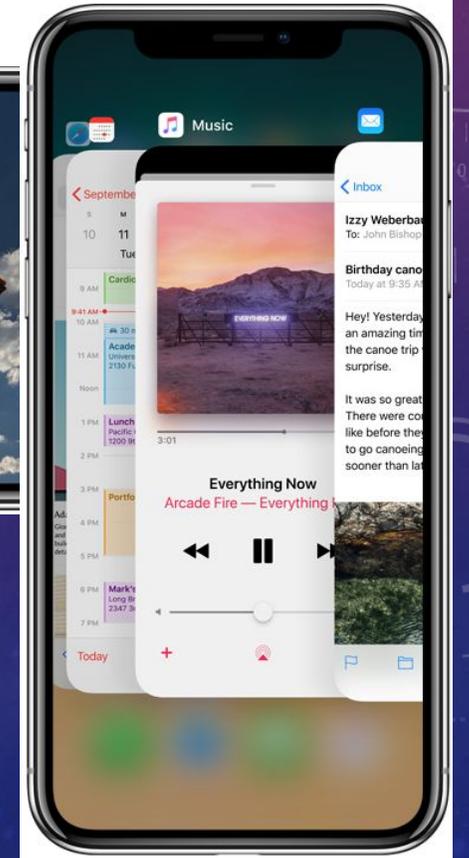

## SECURE AUTHENTICATION

Due to the Face ID feature, the likelihood that your smartphone will be hacked, almost unreal. So, it is easier to use a credit card, for example, or other opportunities that support this feature.

# IPHONE X IS SUUPERR-R-R-R

The benefits of this gadget you can list forever, because it is a smartphone of the future, accordingly APPLE has invested in this device many years of work and effort. And every ruble invested in it will not be superfluous.

## THE REAL MAGIC WITH THE IPHONE X

What we are told is not all that there is in it, it's just a small quarter of the new technologies.
