Let us introduce ourselves at first.

***Our goal:
To provide the earth
with reliable guards.***

***Malika
Rustamova***

***Makhsudakhon
Ibragimova***

Malika Rustamova

"We believe our idea will change the world. We don't need to worry about our safety."

Makhsudakhon Ibragimova

"Safety doesn't happen by accident. Our robots are going to be irreplaceable :)"

**Powerful
robots...**

***More lives will
be saved and
less people
will disappear.***

They will be all over the world.

Why we produce these robots?

To provide with safety other people, who can be in danger.

How will they do so?

How will they do so?

Of course, you will ask this question. The answer is simple:

- --Whenever someone is in danger, he/she should press the button, which can be located anywhere, like on a ring, on the bracelet or on the backpack, or even just in the pocket.
- --After pressing there will be a signal sent to the nearest robot.

There are many functions let's look at some of them

- Robot can save you during the fire**
- It can deliver you to the hospital**
- Can give First-aid**
- Even if you did not press the button, the robot is making the diagnostic of your health and environment every 25 minutes (also you can customize diagnostic schedule). Only for personal ones.**
- In the future we are going to add the feelings, so the robot can analyze your mood and according to these results give advices (it is expected to download data from cognitive science research)**
- Help when you are attacked by another human-being.**

Problem?

PRESS THE BUTTON and....

The Market

The image features a large, light-colored circle in the center containing the text 'The Market'. To the right of this circle are three smaller, overlapping circles, each containing a sub-element: 'Target market' at the top, 'Competition' in the middle, and 'Our Sponsors' at the bottom. The background is a blurred image of business professionals in a meeting, with a blue color overlay.

**Target
market**

Competition

**Our
Sponsors**

- Our target market includes all ages

- It does not matter whether you study, work, retired

The main purpose is to help PEOPLE in any situation.

Target market

Competition

The only competitors that we can have by this time are humans. No one before created the robot that can solve variety of life problems that a human can meet in his life.

Our Sponsors

Financing

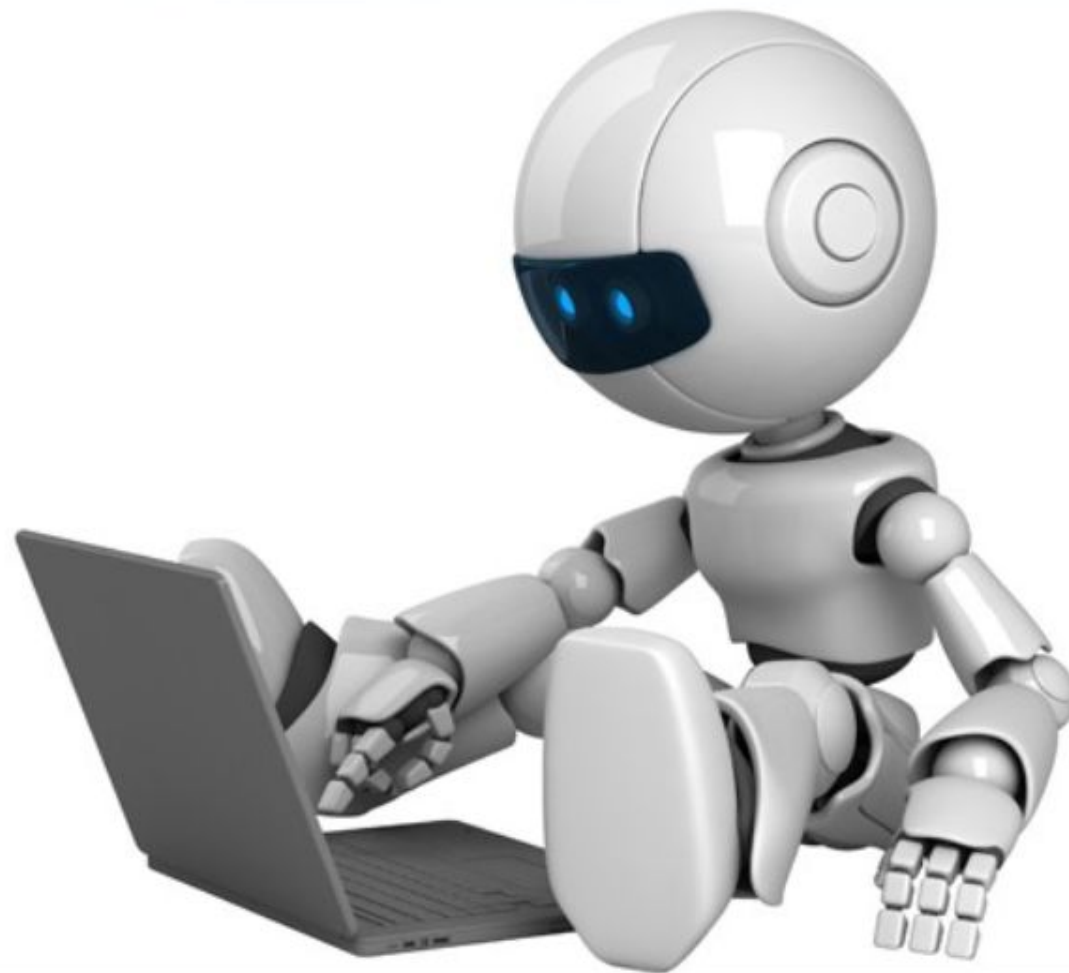

Surely, as we can understand, we will need a budget and not little amount. That's why we have many sponsors.

Materials	Engineering, marketing etc.	Office and lab renting
Necessary supplies	Programmers, namely Inha students	Personal labs in each country
Materials for robots \$2000 (per one)	PR 10.000\$	Labs for creating
Materials for creating robots ! \$150000	Some trainings 5000 \$	Labs for fixing
Total \$160.000	Managers \$50000	Their house, they need them too)
	Lawyer \$60000	Total \$200.000
	Total \$125.000	

TOTAL AMOUNT OF MONEY IS ABOUT \$500.000
