Access Control – technology

Partizan AC is a really very simple and very reliable. Now you can automatically control all entrances and exits, manage any special equipment, even from your mobile device!

Access Control has never been so simple and so reliable. The most flexible settings and configuration of staff scheduling, intelligent door management, multilevel algorithms of reactions, a powerful built-in memory controller can service up to 120 000 users and store 200 000 events. And this is just the beginning. With Partizan ACM software modules you can fully manipulate objects of any size at your fingertips.

Portfolio. Access control
