The smallest in the world geksakopter (??)

- 0 **3D Roll:**
There are **3 speed channels** of the remote control: Low speed channel, medium speed channel and high speed channel. At any channel you press the roll button on the top of the transmitter, X900 will roll forward or backward accordingly. When the X900 is in the high speed condition, the roll action can be done through controlling the forward / backward control stick and leftward / rightward flight control rod.
- 0 **Manual Roll (at high speed channel):**
When **both of the left and right control stick travels are more than 95 percent**, roll action will be performed once. **When both sticks less than 95 percent**, X900 will perform the flight according to received control signal.
- 0 **One key Roll (at any speed channel):**
You can easily enjoy the fun of rolling by just press one key roll button to realize. Before rolling, make sure X900 is flying 3 meters high from the ground, then press the button, X900 will roll forward or backward according to the given signal.

0 3D Flip “n” rolls:

X900 can be controlled to roll as the letter “n”. Amazing and exciting.
