

Natural resource depletion

By Kornyakova Daria

Natural resource

Renewable

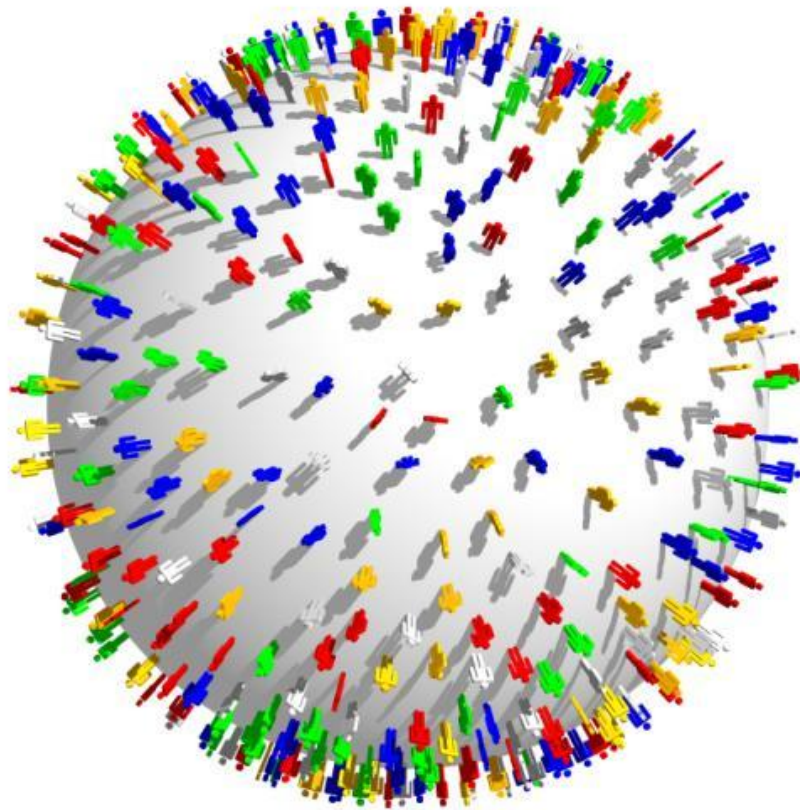

Non-Renewable

The main causes of depletion of natural resources

Population growth

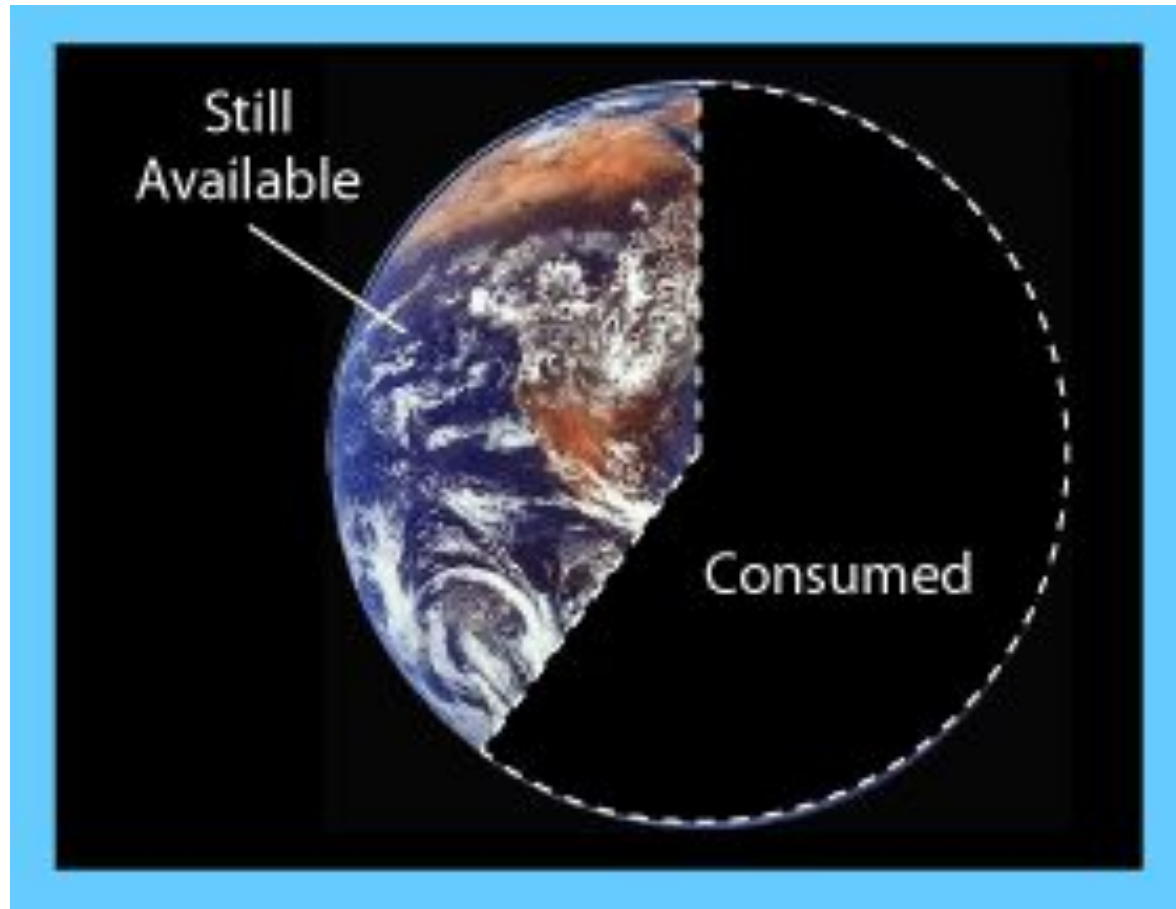

Deforestation

Natural calamities like flood and drought

Over consumption

Pollution

Conservation of natural resources

- take the responsibility to conserve natural resource;
- reduce the consumption of natural resources;
- use non-conventional energy instead of conventional;
- strictly control consumption of resources that are non-renewable;
- use smokeless fuel efficient motors.
