

The background features a dark blue gradient with a starry space pattern. On the left side, there are several technical graphics, including a large circular scale with numerical markings from 140 to 260, and several smaller circular diagrams with arrows indicating rotation or movement. The text is positioned on the right side of the image.

FUTURE TECHNOLOGY

SMART HOME

WHAT IS SMART HOME?

- A *smart house* is a house that has highly advanced automatic systems for lighting, temperature control, multi-media, security, window and door operations, and many other functions.

- A smart home appears "intelligent" because its computer systems can monitor so many aspects of daily living. For example, the refrigerator may be able to inventory its contents, suggest menus, recommend healthy alternatives, and order groceries.

SMART HOME IS VERY COMFORTABLE FOR OUR LIVES

- The idea of a smart home may sound like something out of Hollywood. In fact, a 1999 Disney movie titled *Smart House* presents the comical antics of an American family that wins a "house of the future" with an android maid who causes havoc. Other films show a sci-fi vision of smart home technology that seems improbable.
- However, smart home technology is real, and it's becoming increasingly sophisticated.

THANK YOU FOR WATCHING!
