# HISTORY

- Westminster Abbey was founded as a Benedictine monastery. This was when most European Christians were Roman Catholic, but following the Reformation in the 16th century the Church of England was formed. Many traditions remain in the Abbey but services are conducted in English, and not Latin.
  - Westminster Abbey is the nation's Coronation Church and also the burial and memorial place for historical figures from the last thousand years of British history.
  - Westminster Abbey is still a working church and all are welcome to attend the regular services.
