

Repairing aircraft

Engine repair

- The state enterprise Plant 410 CA is open to mutually beneficial cooperation in repairs and technical maintenance of aircraft engines.

- The D-36 engine has proven to be good in operation and reliable and has a very long designed and overhaul life

- The center for repairs of custom-built aircraft repairs aircraft assemblies, units, and systems and assemblies of the D-36 engine.

- Major repairs on D-36 engines at the plant with the process cycle of 45-60 days are monitored and supported by the designer and manufacturer.

- The basic criteria for repairs are no-failure operation and the overhaul life.
