

My favorite place in Crimea

Masha Geyzer
Form 11

Waterfall Jur-Jur

- Everyone has a special place, somewhere they t have happy memories of. Well, for me it's waterfall Jur-Jur. It's my favorite place in Crimea. The waterfall is in a truly spectacular location and there are many exciting things to see and do there.

Name

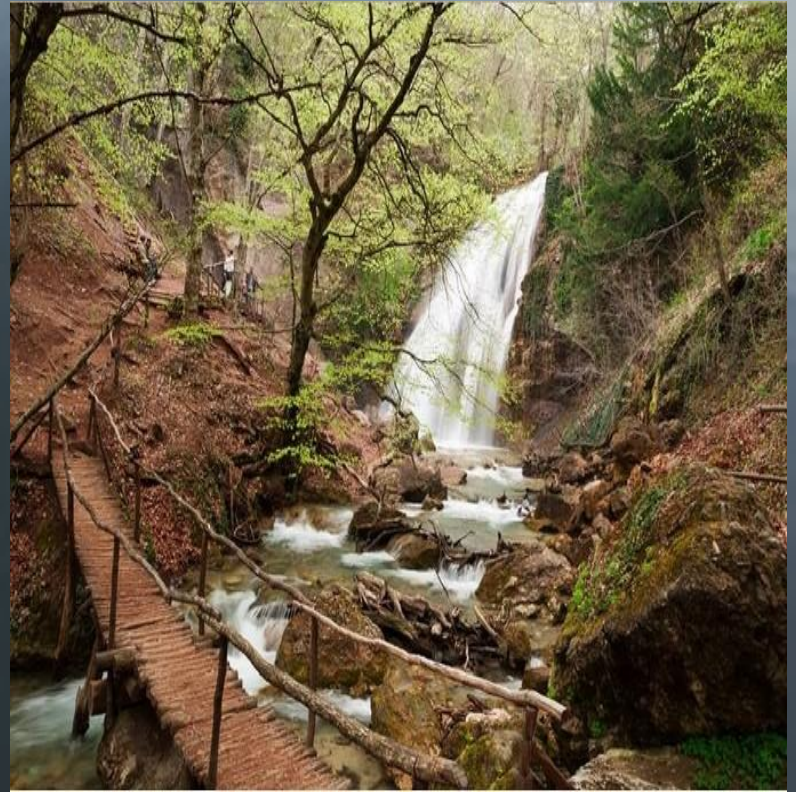

One version says that Jur-Jur means ‘forever babbling,’ another one states that it is just an untranslatable imitation of the sound, made by water, gracefully falling down from the cliff. Anyway, the waterfall fully lives up to its name: it doesn’t make noise or rattle, but gently babbles, slowly sliding down the ravine.

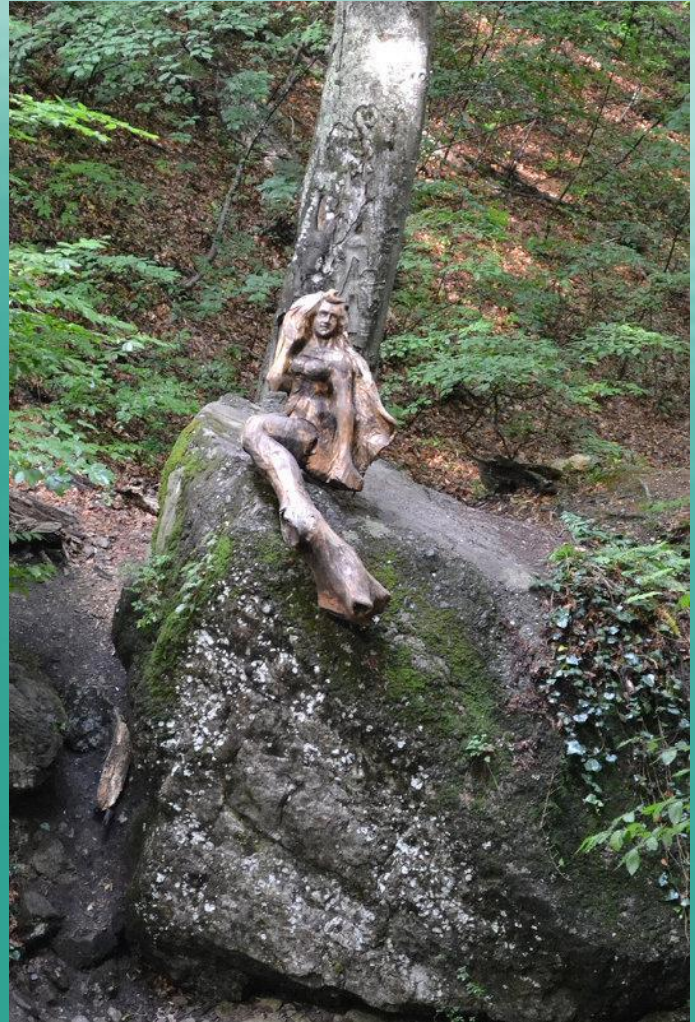

Location

Waterfall is located on a mountain river Ulu-Uzen East in the tract Haphal, Alushta. Average consumption is 270 liters of water per second, from the height of 15 meters, width up to 5 meters. It does not dry out even in the driest years, unlike other Crimean waterfalls. Upstream there is a cascade of very spectacular waterfalls and rapids, with a total height of fall of about one hundred meters.

- The waterfall and the area around is a unique and stunningly beautiful. As you approach the waterfall via a scenic trail found a lot of amazing wood sculptures created by local residents , and bizarre forms of trees with exposed roots on the surface , about which I continually stumbled.

- While there, I took lots of photos, in the beech forest , which, as in a fairy tale, and I heard this mesmerizing sound of falling water. But the most memorable was swimming in a bath at a temperature of 8 degrees.

Waterfall Jur-Jur is a fantastic place! I have many unforgettable memories of the unique sights, sounds and smells there and the exciting things I did. It will always hold a very special place in my heart.
