

Ecology in Russia

**Author of this
presentation:
Ivanov Sergei**

**«Look after this
planet, it's the only
we have»**

Prince Philip

The ways of air pollution

In big cities such as Vladivostok *cars* are the biggest air polluters

**More and more
factories and *plants*
add their bad
breath to the air**

There are more than 314 of industrial enterprises that pollute air in Primorye

The ways of water

Ecology in Russia

- Companies dump chemical wastes into water
- Acid rains
- Farms spray pesticides on crops
- Litter and trash

Ecology influences on human's health

***Pollution (air, water, radiation) worsens human's health, it causes dangerous diseases of the most internal organs:**

- *Lungs,
- *Bronchus,
- *Heart,
- *Liver,
- *Stomach,
- *Sex organs,
- *Blood circulation

Ecological problems

- * pollution in its many form (water pollution, air pollution, acid rains, land pollution nuclear pollution)
- * disappearing animals
- * destruction of the wildlife and beauty of countryside
- * shortage of natural resources
- * depletion of the Ozone Layers
- * global warming (greenhouse effect)
