

# Information Technology *in my life*

SPK - 4 Golomazov Artem

Hello! My name is Artem  
and I'd like to tell you  
about Information Technology  
**by using Information Technology!**

Yes, this presentation is rather strange  
but significant way of communicating with a  
computer.

It shows how differently we can use  
Information Technology in our lives.

What is Information Technology:?

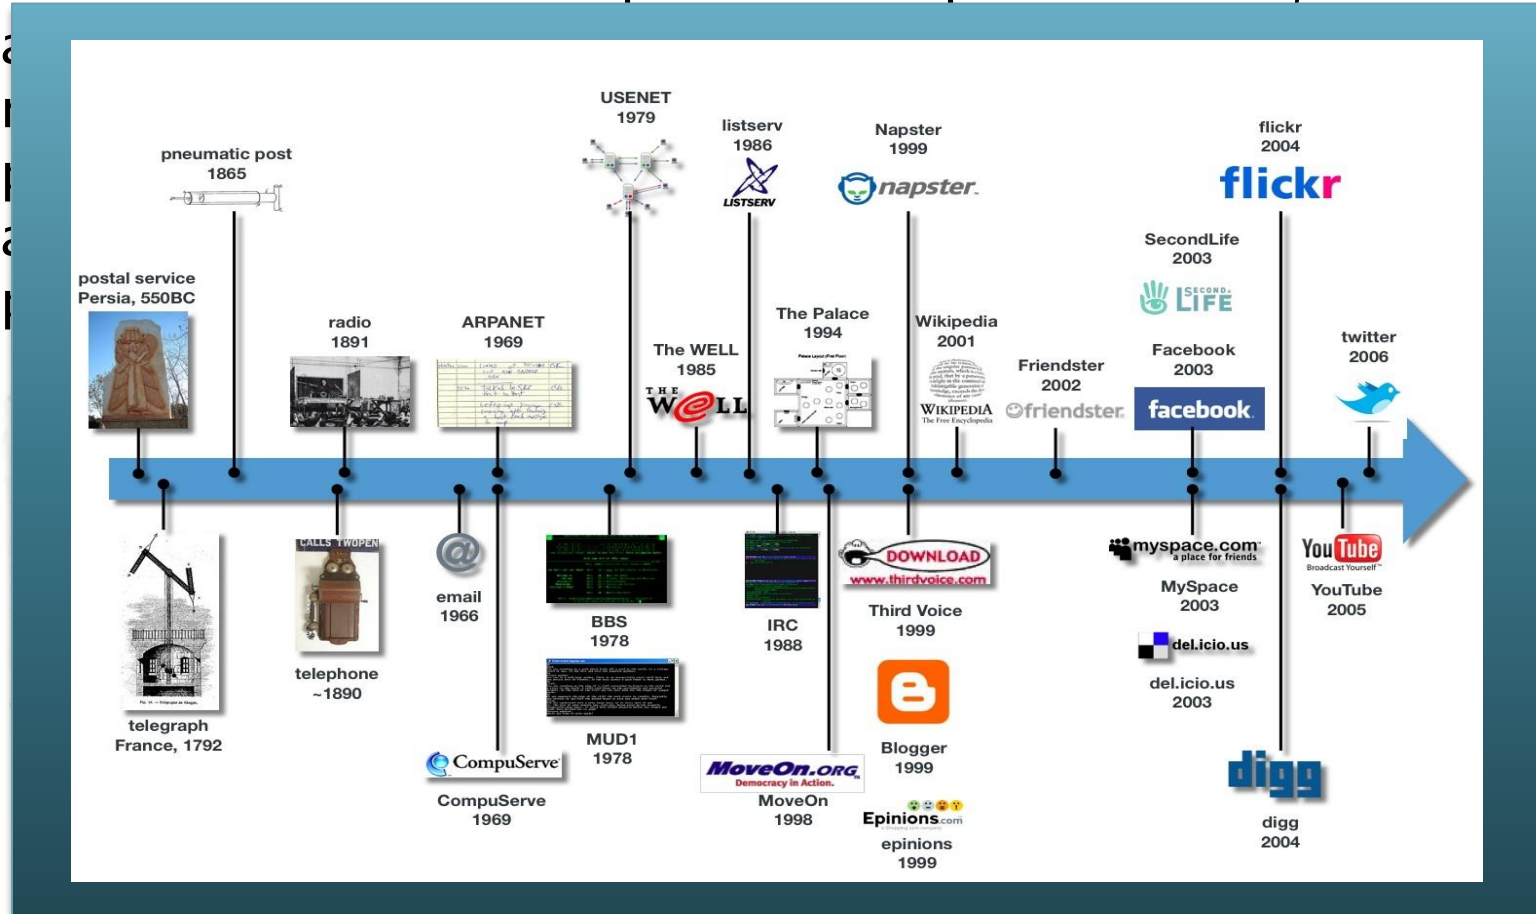

**Information technology (IT)** is the application

The term is commonly used as a synonym for computers and computer networks, but it also encompasses other information distribution technologies such as television and telephones. Several industries are associated with information technology, including computer hardware, software, electronics, semiconductors, internet, telecom equipment, engineering, healthcare, e-commerce and computer services.

# History of Information Technology takes its origin long before the modern discipline of computer science, which

the modern concept

## IT Technologies

Information technology includes all the resources needed to manage information, especially computers, software, and network necessary for the creation, storage, management, sharing and retrieval of information.

Network

Terminals

Services

Every day new IT technologies and trends that are currently on the wave of popularity of smartphones,

A smartphone is a mobile phone with an advanced mobile operating system which combines features of a personal computer operating system with other features useful for mobile or handheld use. They typically combine the features of a cell phone with those of other popular mobile devices, such as personal digital assistant (PDA), media player and GPS navigation unit.

Almost everyone already has a smartphone and use it for various purposes

Smartphones have all the opportunities that the computer, and now occupy an important place in the Internet space

And now... try imagining your life without information technology.

## IT Technologies

### Game console

Specialized electronic device, designed and developed for video games. The most commonly used device is a television display or, at least, a computer monitor - and therefore such devices are called consoles, since they put to an independent display device.

ace

### Web search engine

Software and hardware system with a web interface that provides the ability to search for information on the Internet. Under the search engine usually refers to a site on which is placed an interface system. The software part of the search engine is a search engine (search engine) - a set of programs that provides the functionality of a search engine and is usually a trade secret of the company-developer of search engine.
