

Extraordinary Dwelling in the world

Upside Down House, Poland, Szymbark

- ▶ *This Upside Down House was designed by Polish businessmen and philanthropist Daniel Czapiewski. House was built in 2006 by Czapiewski's company which specializes in wooden houses. It took 114 days to build the house when typical project would normally take 21 days to build. By setting a traditional Polish house on its roof, Czapiewski wanted to express the disorientation people feel in a rapidly changing world, both during Communism regime and nowadays.*

- ▶ ***Bullring Shopping Centre is part of the construction project in Birmingham , Europe's largest shopping center , consisting of four projects : an indoor food market on the 90 trading locations (completed in 2000) A feature of the design concept is the combination of different architectural styles - from classical to avant-garde . Bullring consists of nine levels: Level 3 - shopping malls , 2 levels by road parking, located directly underneath the complex , one dedicated to the management of shopping centers and the remaining three are technical level .***

- ▶ ***Kettle House in Texas, USA, not only looks like a kettle, but there are rumors that he is working as a kettle. In this house no one lives, but people see as a regular young man comes and does something to it. Nobody could talk to him, so we'll just have to guess, what built this house. Maker or float it in case of flooding?***

- ▶ *This stone house in Portugal is a good example of how the elements of nature may find practical application. As surprising as this house did not look, but people actually live in it.*

- ▶ *Crooked House is one of the best examples of that is able of design idea and how now developed construction technology. Outline curves make it one of the most exceptional and unusual houses in the world. The inscription above the entrance and says "Crooked House".*

- ▶ ***Use-cube from Rotterdam, Netherlands, combines a group of houses that have the geometry of a cube. Most surprising of all this is that it is unclear how it all holds and how this construction managed not to fall.***

- ▶ ***A house-hole from Texas, USA, creates a stunner. The entrance to the house is done in a way that gives the impression that this is some kind of art project, but for many it is associated with the consequences of a terrible accident.***
