#### Pudozh, a land of amazing nature.

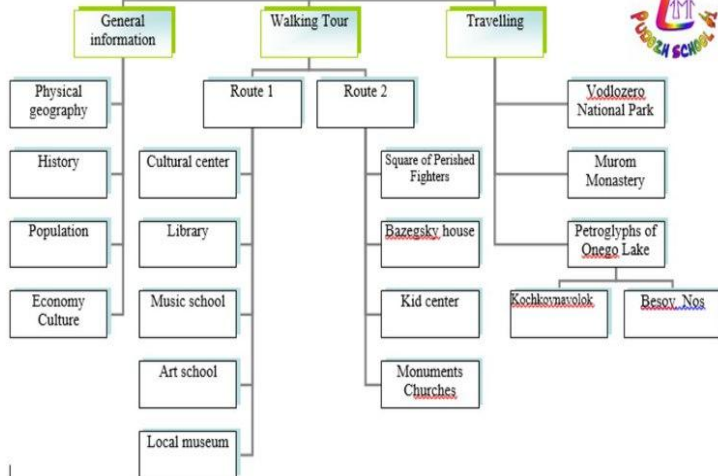

Pudozh land is a land of amazing nature. It is a land of attractive landscape, white nights, blue rivers and lakes, dense forests and rocks. We have got a lot of fish in the lakes and rivers. Pudozh land is well-known for the natural majestic beauty, historical and cultural monuments, peaceful and friendly people.

Pudozh land has got the unique nature: 50 species of mammals, more than 200 species of birds and more than 20 species of fishes are living here. People enjoy boating and fishing here. There are many wild animals here. They are: hares, lynxes, bears, wolves, elk, squirrels, foxes. The host of the north forest is Black Bear. White-tailed sea eagle is put down into the Red Book of Russia. Many tourists come to our place every year. They like resting and hunting.

The best known tourist attractions are Muromsky Monastery, Demzon's Cape (Besov'Nos), Vodlozero National park, Ilyinsky Pogost. Vodlozero National park is the first in the north of Russia. It is the largest national park in Europe.

#### PUDOZH HOME, SWEET HOME

My home town is Pudozh. "Pudozh" in translation from Vepsian is a branch, a bay. It is situated in the south-east of Karelia. It stands near the river Vodla. The population of Pudozh is 11 thousand people.

Pudozh is not far from the capital of Karelia, Petrozavodsk. A trip to Pudozh by road is long and takes time. Pudozh region borders on Volongokaysa area, Arkhangel'skaya area and Medvezhegorskiy region.

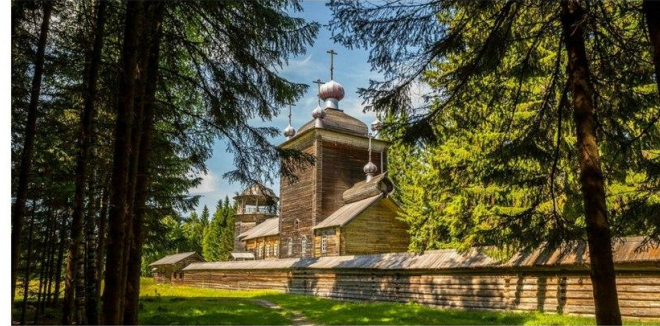

Pudozh is one of the oldest towns in Russia. It was founded in 1382. In 1785 Pudozhsky Pogost became a town by the decree of Catherine the Great and got a coat of arms in 1788. One can see flax on it because many years ago our region was rich in flax. In 1999 Pudozh was given the status of a historical town.

Pudozh is rich in granite and wood. Timber industry is the leading one. Pudozh land is rich in the monuments of history and culture. Our town is well-known for Muromsky monastery. It was founded in the 14th century. Numerous petroglyphs - carvings on the rocks were found on the eastern shore of Onega. These petroglyphs tell their own story how people lived thousands years ago. Pudozh is also famous for Vodlozero National park and Ilyinsky pogost. Ilyinsky Pogost was built on Kolgoostrov island (Lake Vodlozero) in the 18th century.

Pudozh is famous for its traditions. The local museum named after A.F. Korotkiy exhibits ancient documents, icons, paintings of local artists. Pudozh land is the motherland of famous North Russian narrators of folk tales.

I like Pudozh with all my heart.

REALLY UNIQUE PLACE

Vodlozero National Park, an object of world heritage.

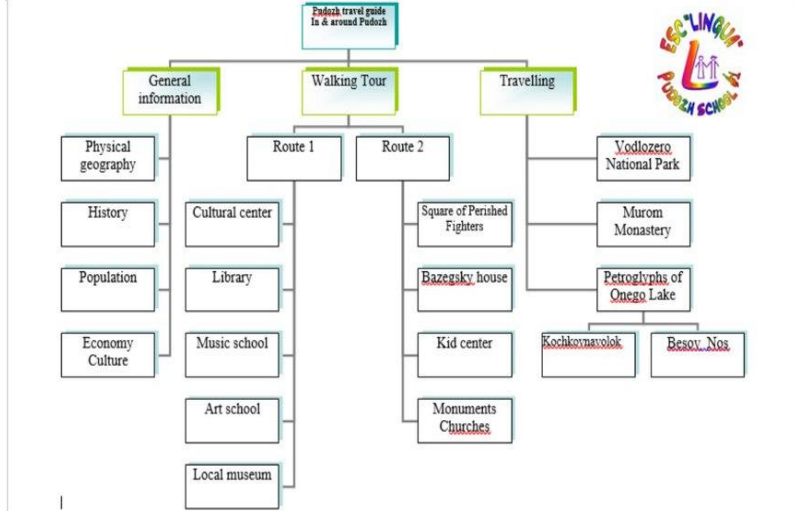

The Vodlozero National Park is situated in the Republic of Karelia and the Archangel District. It has a staff of trained experts and rangers who are ready to serve visitors. The administrative center of the Park is located in the village of Kapanavolok. It also has an office in Petrozavodsk and in Onega.

The Park was the first national park in the northern part of European Russia. It was established by decree of the government of the Russian Federation in 1991 to preserve the unique natural environment and cultural heritage of the Vodlozero area, to carry out scientific research, organize ecological education and tourism.

Today the Park is a venue for international scientific expeditions, seminars, conferences and museum exhibitions.

The Park also arranges summer camps for schoolchildren. The ancient traditions: folk festivals, songs and crafts are revived. The old churches are restored, chapels and holy crosses are erected in memory of the deserted villages. The guides and the rangers of the Park maintain the tourist center, campsites, hiking trails and other facilities.

The point of Vodlozero National Park is Ilyinsky Pogost

### Churches in Pudozh

My home place is Pudozh. It is an ancient town, founded in 1382. Pudozh is rich in the monuments of history and culture.

It is well - known for the local museum, Gurjevsky bridge, my school, kid's centre, Town square, Administration building,

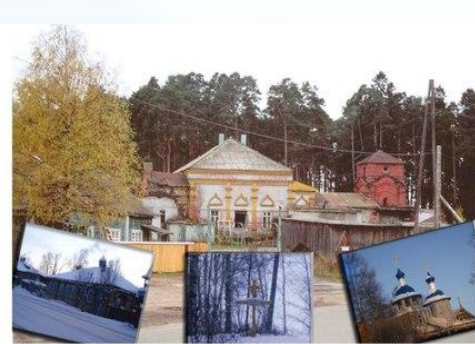

Vodlozero NationalPark and Iivinsky pogost, park "Summer garden" and Muroom Monastery and others.

I hope that you will enjoy our walking tour around my native place. There are three churches in Pudozh: church named after A. Nevsky, church named after S. Sarovsky, God's Mother church.

The oldest church named after A. Nevsky was founded in 1903.

The history of Pudozh has always been connected with the name of Saint Alexander Nevsky. He is considered to be a patron of the Northern lands, including Karelian pogosts. In 1898 the merchant N. Bazegsky offered people to construct a church or a bridge on his own money. They chose a church. The church with a belfry was built of red brick. Next to the church there is a wooden chapel and a family burial place of the Bazegskys. The years of the Soviet power were the years of trouble for the church. It was closed and destroyed. The milk factory was housed in it. In many years the building was returned to the church. The restoration lasted several years and was successfully completed.

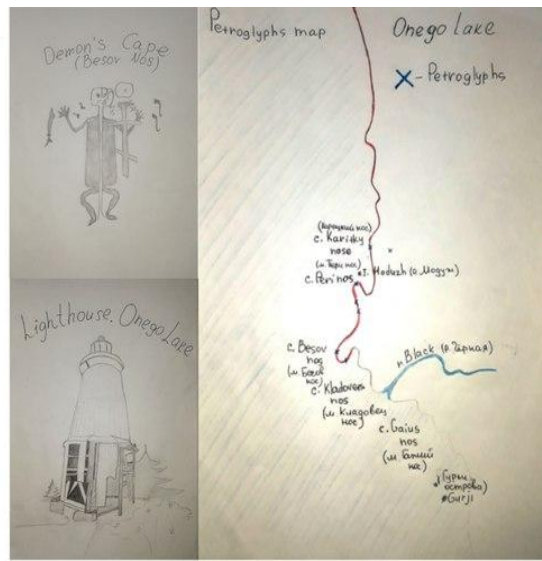

The church is a place for Christian worship and prayer. It is one of the most magnificent building in our provincial town.

My favourite place to visit in summer. Onego petroglyphs  
There are more than 200 archeological monuments in Pudozh land. They are stands of people, carvings on the rocks and graves. A lot of them are located near Onego lake.  
Pudozh petroglyphs (carvings on the rocks) are well known all over the country.  
This rock art was discovered in 1943 by a paleontologist from Saint-Petersburg K.Grevink and P. Stavel, a teacher of Petrozavodsk secondary school.  
Petroglyphs of Onego lake stretch for 20 km. The petroglyphs were carved by the stone tools at a depth of 1-2 cm, they vary in size from 10 to 50 cm, reaching 3 m. There are 1200 images. The main motifs are birds, animals, humans, boats, enigmatic signs and so on.  
The ancient cliff drawings were known to the people of the surrounding villages, fishermen and hunters. The Monks at the Muroomsky Monastery knew about them, too. They carved the Christian crosses on the figures of the deities and a swan, but did not touch the drawings themselves.  
The most interesting drawings are at Demon's Cape. Here the legs or devil over 2 meters tall, the fingers of both hands spread out the legs are short. He is the centre of a complex composition, surrounded by a large shag-deer and other and many smaller animals and birds.  
Thus, Onego petroglyphs are unique source of knowledge about the history of Karelia.
