

Sport Ambiance v2
Website and application
December 2016
redesign

Overall scope

Joomla based website with editorial content

Joomsport plugin integration to create a sport league manager

Joomsport plugin customization to add new features

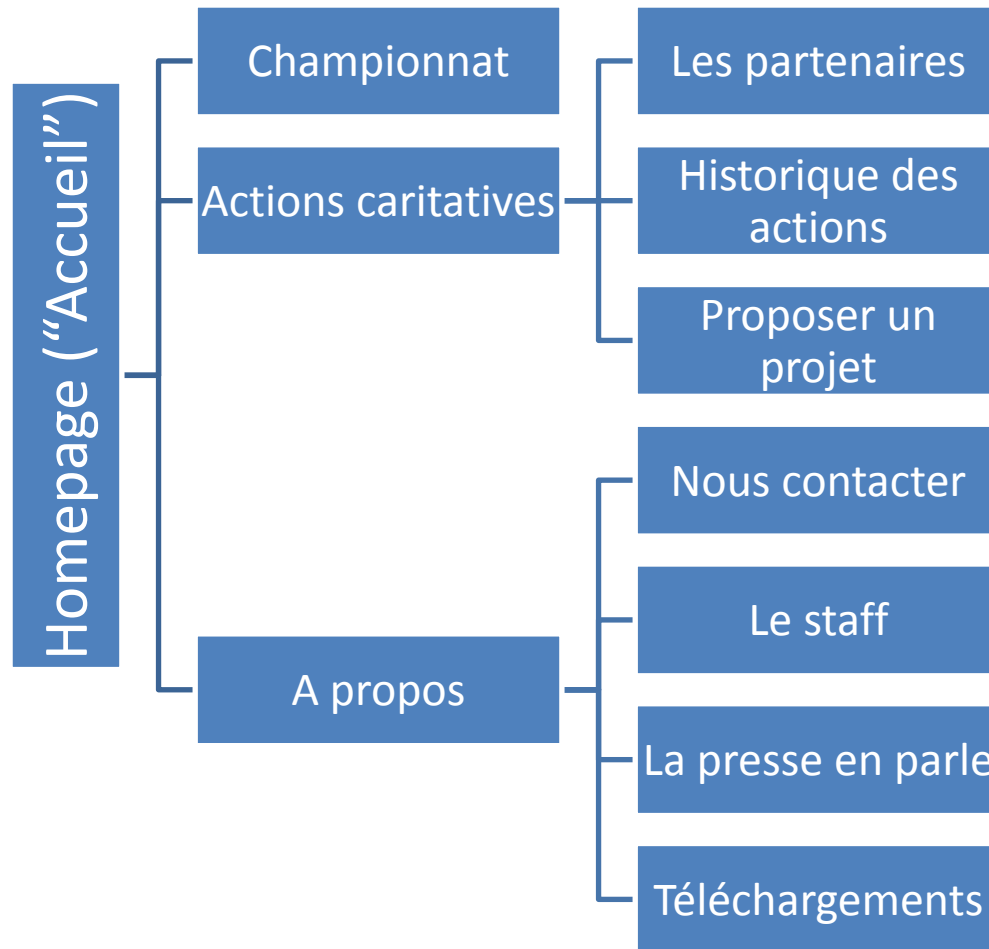

Overall technical deck

- Joomla is recommended as CMS option
 - Joomla 3.4 or higher must be used
- The Joomsport plugin v4.0.19 or higher must be leveraged
- This document only captures the expected functionalities
 - The look and feel of the front end pages is out of scope for this deck

Sitemap

DIGITARTS

Editorial pages

Editorial pages

- Editorial pages must all be fully manageable via the Backoffice (author roles)
- Authors should not be allowed to add/remove pages
 - They can however edit the content of pages and push them online/offline
- All editorial pages are proposed with an initial display template
 - Authors can modify the content but also the look & feel
 - Ideally, there should be a locked and archived version of each original page template

1st category : Action caritatives

Les partenaires

- List of partners
- Detailed information about each
- Initial template to be developed
- Fully manageable via backoffice post go live

Historique des actions

- List of past charity actions
- Initial template to be developed
- Fully manageable via BO post go live

Proposer un projet

- Contact form with banner
- Offices geolocation
- Fully manageable via BO post go live

2nd category : A propos

DIGITARTS

Nous contacter

- Contact form with banner
- Offices geolocation
- Fully manageable via BO post go live

Le staff

- List of staff members
- Initial template to be developed
- Fully manageable via BO post go live

La presse en parle

- Short news
- Initial template to be developed
- Fully manageable via BO post go live

Téléchargements

- List documents available for download (docx, pdf, jpg, png)
- Documents could be previewed in a lightbox
- Documents could be downloaded to file system
- Initial template to be developed
- Fully manageable via BO post go live

League manager

League manager Done

- The league manager enables the admins and moderators to organize championships and other type of events
- Only the championships are documented in this brief
- All front end pages related to the league manager must be page types supported by the Joomsport plugin
 - Some custom page types may have to be created within the plugin

Fairplay points

TODO

- After each match, each team must be able to attribute fairplay points to the other one
- Fairplay points are given based on multiple dimensions
- The different dimensions and the maximum of points attributed for each is to be confirmed
- The list and max value of the dimensions must be configurable
- It is recommended to create extra fields on top of the team entity to manage fairplay points
- Fairplay points attribution must be done through the match details form
- The calculation of the average fairplay points for each team can only be triggered by the administrators
- Administrators are allowed to add or remove points on the average fairplay score (maximum to be confirmed)
- The bonus points mechanism offered by Joomsport can be used as a basis
- This feature must be available in the following way :
 - In the « Moderator » section for edit
 - In Joomla administration panel Joomsport component management for review/validation by Administrators
 - The fairplay points must be displayed on the ranking tables :
<http://www.sportetambiance.net/championnat/classement-de-saison>

Player data

Done

Additional fields (extra fields)

- email
- telephone
- adresse complète
- date de naissance (date of birth)
- profession (dropdownlist with following options : etudiant/salarié/liberal/sans emploi)
- poste dans l'équipe (dropdownlist with options to be defined)
- numéro de maillot (number)
- Status : moderator (user should be made a moderator for the team), sub-moderator (to be confirmed by client)
- Photo (use the existing image field)
- actif/inactif (possibility to set the player active or inactive)
- profil facebook (url to FB profile)

Each field could be set public or private by the moderator/admin individually for each player

Mandatory fields

- Nom
- Prenom
- Email
- Adresse complète
- Date de naissance

Team data Done

Additional fields (extra fields)

- nom d'equipe (team name)
- email
- site web (URL)
- nom du terrain (preferred venue from a dropdownlist)
- horaire préféré : preferred day for a match from a dropdown with the following values
 - samedi matin
 - samedi après midi
 - dimanche matin
 - dimanche après midi

Mandatory fields

- Team name
- Preferred venue

Venues data Done

- surface de votre terrain (optionnel)
- ville de votre terrain
- adresse du terrain

Match postponing TODO

- Joomsport already provides a way to reschedule matches on another matchday
 - This is done via Joomla Administration by administrators
- However, the client needs to be able to bring this postponing feature to Moderators as well
 - This needs to be made available for Moderators
 - All postponing request will still have to be validated by administrator
- Postponing matches must be allowed only a limited number of occurrences for one same team during a season
 - Number to be configurable
- The number of postponed matches per team is to be reflected on the season ranking page

Exports

TODO

- It must be feasible to generate extracts from the database for the below elements :
 - Players
 - Teams
 - Matches
- It must be able to trigger extracts from the backoffice by administrators
- Players extract must be ready for import into AcyMailing as users

All stars votes

TODO

- A voting mechanism must be available to identify best players
- The vote period is started and ended only by administrators
- The best players pool is composed of :
 - 1 goal keeper
 - 4 defenders
 - 4 attackers
- Each team can only vote once
- Each team vote is composed of
 - 2 gatekeepers
 - 5 defenders
 - 5 attackers
- The vote results must be available on the All stars page and available for all the website visitors

Newsletter

- Administrators need to be able to trigger emails via AcyMailing
- Emails can be sent to :
 - Moderators
 - Players
 - All database
- Joomsport Moderators are available through AcyMailing by default
- Joomsport Players must be imported into AcyMailing using the player export described on slide #16

TODO

Messaging

TODO

- It must be possible for logged-in mediators to send messages to administrators
- This feature must be made available within the Moderation section
- All administrators will be notified at once

**Updates needed on
Joomsport pages and
modules**

Championship ranking page

- The fairplay points must be displayed on this page as well
- Currently, it is possible to define which lines must be highlighted on the ranking table
 - Top 2 lines are defined to be highlighted in green
 - Lower 2 lines in red
- It is not possible to define specific line highlighting per group
- It must now be possible to define highlighting rules for each group

Championship teams page

- Currently, the championship team page returns all teams for one season in bulk
- There is no way to filter through pools
- It must now be possible to filter the teams by group

Championship mediators page

DIGITARTS

- Fairplay points management must be added to the mediator section

Merci
