

# MODERN COMPUTERS

# First microprocessor

**Produced:**

From late 1971 to 1981

**Common manufacturer(s):**

Intel

**Instruction set:**

4-bit BCD-oriented

**Transistors:**

2400

White ceramic Intel C4004 microprocessor with grey traces

# Several categories of the computer.

# Microprocessor now

Intel Core i7-4790K

**Produced:**

10 november2008 to Until  
now

**Common manufacturer(s):**

Intel

**Instruction set:**

64-bit BCD-oriented

**CPU frequency:**

1.07 - 4.2 GHz

THE END.
