

Management is the process of purposeful impact on the system (mechanical, technological, biological, social), which reached its orderliness, development in accordance with the objectives

Planning - this stage of the management process, which defines the purpose of the activity, necessary means, and methods that are most effective in specific circumstances.

The image features a blurred background of a modern office with large windows. Several business professionals in business attire are standing and talking in small groups. In the foreground, a desk is visible with various business-related items: a silver tray, a pen, a calculator, a glass of water, and several documents. The documents contain bar charts and text, though they are out of focus. The text 'The organization Is the creation of the business model of the enterprise and efficient management.' is overlaid in a large, red, serif font across the center of the image.

The organization Is the creation of the business model of the enterprise and efficient management.

For effective
management or control
managers need regular
communication with
employees.

In order to efficiently perform these functions, managers must have interpersonal, organizational and technical skills

people to work, which involves the use of human behaviour to achieve personal goals or the goals of the organization
human Behavior is determined by motives

When the books are open, everyone can see what is going on. It's harder for managers to fall back on excuses or to point the finger at someone else.

Open-book management gets people involved and helps them take responsibility rather than shirk it. It's a way by which everyone in the business can hold each other accountable.

Thank you for attention!
