# ROUTER-POWERBANK

PREPARED BY: MEIRZHAN.K AND BELGI.R  
CHECKED BY: AINUR KALIASKAROVNA  
ENGLISH LESSON

# THIS IS A LIST OF WHAT WE WILL SAY:

- 1. Introduction to such a prototype
- 2. Advantages of this thing
- 3. And in the ending let's talk about the development of this type of prototype in the world

# WHAT IS POWERBANK?

- Powerbank-portable power supply which is easy to carry with large capacity. It also has a very personal name: “mobile phone lover”.

10000<sup>mAh</sup>  
XiaoMi Power Bank

Support USB Type-C Charge And Discharge / Bidirectional Fast Charge / Ultra Slim Only 12.58mm

# HOW TO USE PORTABLE CHARGERS?

Fully charge a power bank by a normal  
5V/2A power band takes about

**6 hours**

Fully charge a power bank by 18W  
fast charge power bank takes about

**3.5 hours**

Save

**40%**

of your time

It's simple, connect a USB cable from your smartphone to Power Bank and your phone is charging. At this time, you can continue to use the smartphone, or wait a while until it is fully charged.

As a rule, all portable batteries are suitable for most devices. Do not charge only those devices that do not support charging via USB.

# WHAT IS THE WI-FI ROUTER?

- In fact, it is a compact Internet source for any device: phones, tablets, readers, laptops. It receives a signal from the mobile Internet provider's network, and then through Wi-Fi distributes the Internet to connected gadgets and computers.

# HOW DOES THE ROUTER WORK?

You just insert a SIM card and get a normal Wi-Fi access point in any location convenient for you. Therefore, you only need a network of cellular operators to provide many devices for the Internet.

# ROUTER-POWERBANK

## Powered to share

The 5200 mAh battery is powerful enough to be a power bank for your other devices. On its own, it can work effortlessly up to 20 hours straight and stand by for over 500 hours.

# ROUTER-POWERBANK

- Router-powerbank: The most versatile device, it combines three devices at once: a 3G / Wi-Fi router, a power bank with a capacity of 5200 mAh and network storage.
- Compatible with any SIM-card, characterized by stable reception of the signal and high speed of distribution. It can be used as a stationary router by connecting the "home" cable to the connector on the case.
- The battery capacity of 5200 mAh allows you to use the device in power bank mode, throughout the day keeping active the smartphone, tablet and other portable electronics.

4G Wireless WiFi Router  
7800mAh Mi Power Bank

- In the conclusion we want to say :This is a very handy thing and having such properties it will make life easier for smartphone users, etc. and Internet users.
