POINT OF VIEW

Malu (MÉXICO)

My point of view about this subject is that for Mexicans the family is one of the most important things in life, where it is said that values are instilled, such that they help the growth of each person. This concept is one of union, since it always seeks the opportunity to meet and live together.

It is said that before the families were much bigger than the current ones, since now it is seen more by the economy of the family and by a better quality of life of the children, reason why now they are smaller now than before and mothers help with the family income by working to help economically.

Elizaveta (RUSSIA)

My point about this topic is that women are increasingly striving for independence and building their professional career, so changing family roles and less emphasis on children. Social statuses of men and women are equal . There is a gradual weakening of demand in the birth of children, the upward trend in single-parent families and the increasing number of divorces.
