FASTEST GROWING (CRAIN'S & DALLAS BUSINESS)
★ ★ ★
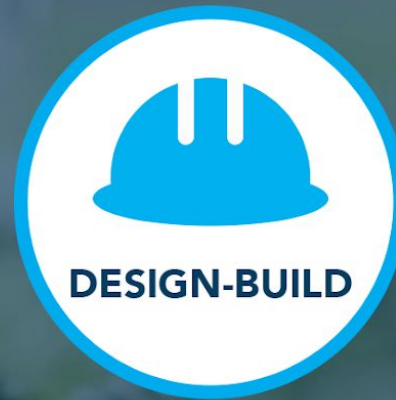

Awards: Animate up sequentially

Going Design-Build Gets You Building Faster

Why Design-Build: Text floats up and pauses momentarily, before floating up in unison with following graphics which replace its place
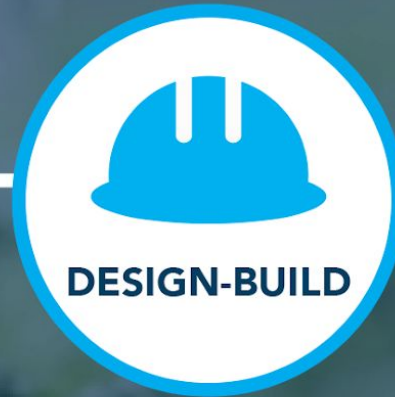

Why Design-Build: Graphics float up, replacing text

Why Design-Build: Timelines emerge from circles and move right to left, design-build going much faster than plan- spec
Why Design-Build: Design-Build arrives at "Groundbreaking" while Plan-Spec is still going. The hat floats out of the circle and we follow it

In-House Expertise: Out of the hat, different services emerge above it, pausing before shrinking and flying to alternating corners until each service is across the top of the screen (next slide)

Project
Management

Structural
Design

Preconstruction

MEP Design

Architectural

Civil Design

In-House Expertise: All the services fly into the hat again, the hat flips over and text floats up above it

EXPERIENCE A BETTER WAY TO BUILD

Wipe transition, slow expand of final text
