# Smart suitcase CX-1

Smart suitcase CX-1 will never be lost at the airport! He follows the owner at a speed of about 10 km / h, following the instructions of the internal card in which he puts the face of the owner.

# Smart mirror Haier

Do not like to pick up suitable stylish ensembles from the available clothes. Clever mirror Haier will pick up a stylish set of available items of clothing in the wardrobe, will tell you where among the things lost the desired jumper or jacket, and even explain how to wash a particular product.

# Talking on the finger

Using a smart bracelet "Signal", you can talk on the phone, just holding your finger to your ear. The micron installed in the bracelet transmits sound through the vibrations of the skin, says the Creator of the device Ming j Kim. According to him, with this technology, the conversation is almost impossible to overhear.

# E-companion

It will be a great companion for old people and children. He has an interactive screen, can sing, dance, play games, tell funny stories and can even discuss with the pensioner her favorite movie.
