

# ***VHMS/WebCARE Introduction***

**Service Business Development Group  
Customer Support Division  
Komatsu Limited**

**KOMATSU**

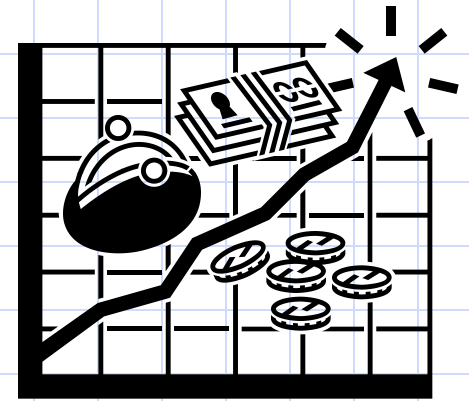

*VHMS/WebCARE,*

**This is not a Service Tool but a management tool for R&M contract business.**

## **Preventive & Proactive Action Using VHMS / WebCARE**

- Reduce unexpected machine downtime
- Reduce Repair cost

# 1, What is VHMS?

## Vehicle Health Monitoring System

Usually,  
Conduct Pm-CLINIC,

Periodically  
ex.) Each  
1,000h

Install  
measuring  
gauges

Record result  
one by one

So, VHMS

during machine  
operate

Information  
from sensors  
on machine

Record data  
into VHMS  
controller  
automatically

VHMS/Web

VHMS Controller

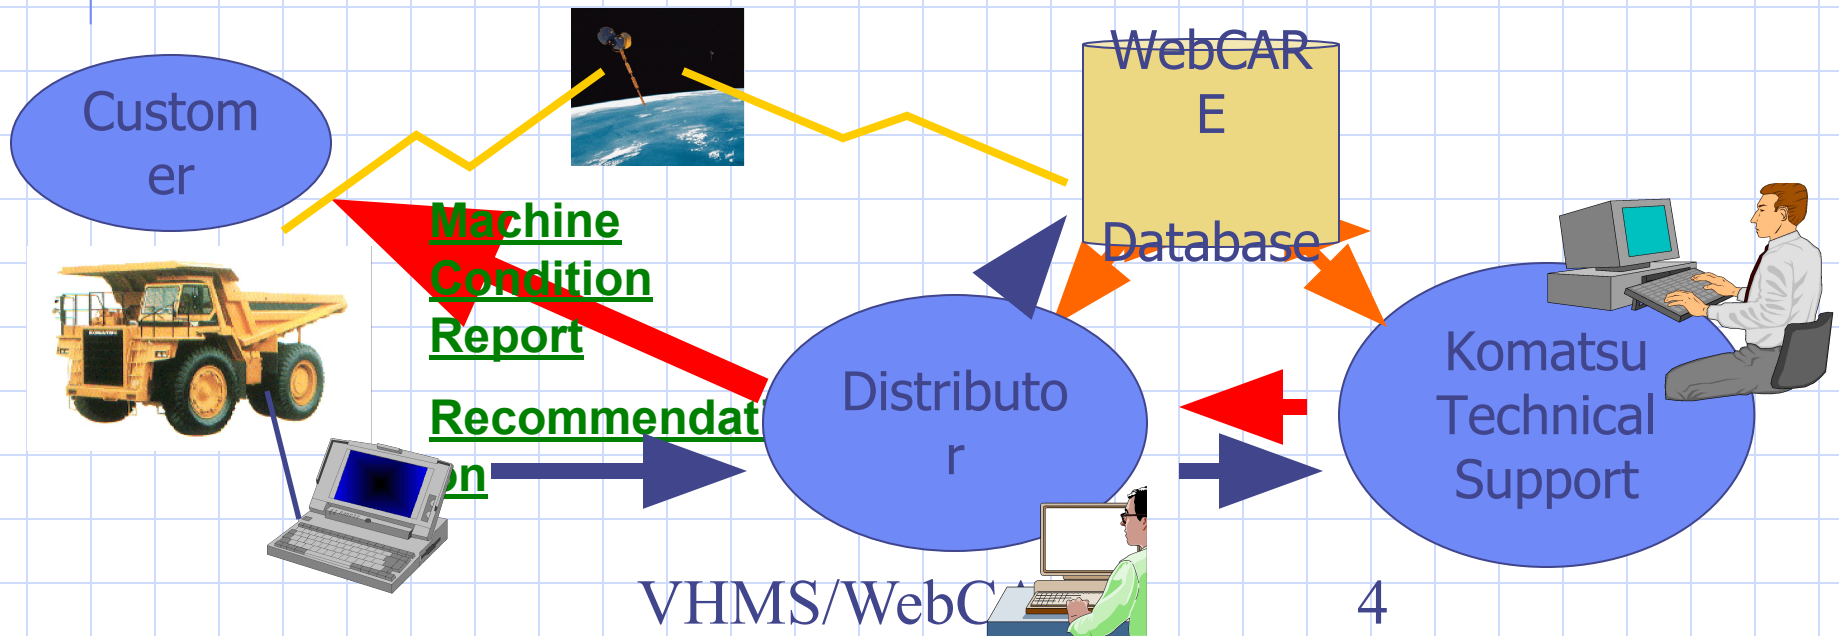

3

# Get machine information in VHMS controller

By PC downloading directly.

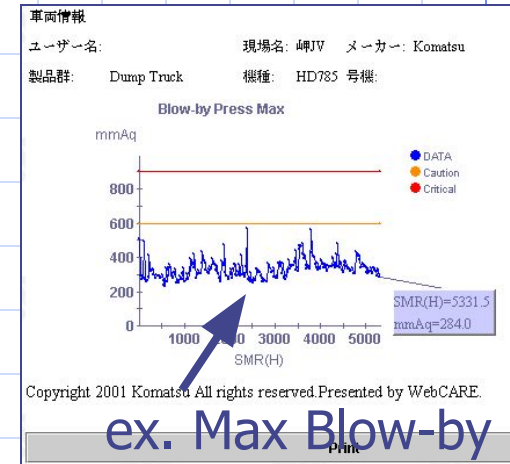

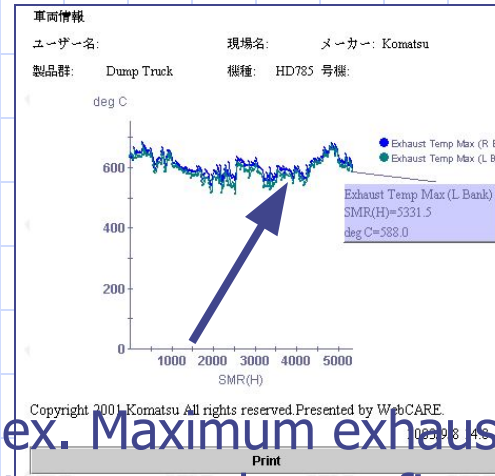

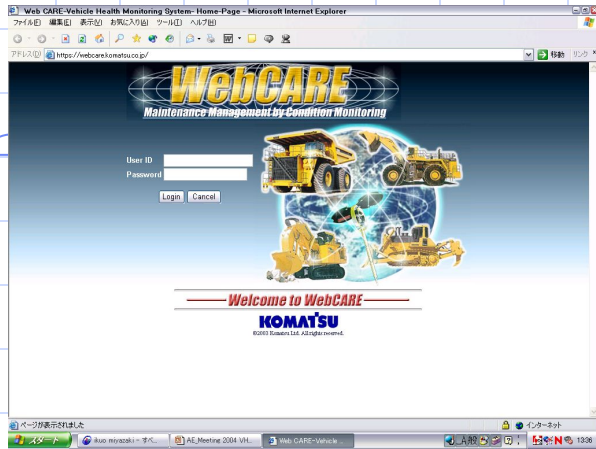

By Satellite communication (Orbcomm) automatically <Option>

**Make it possible to recommend customer advanced technical support, Scheduled O/H plan for component and so on.**

# 2, What can be found by WebCARE?

## (3) Trend Graph

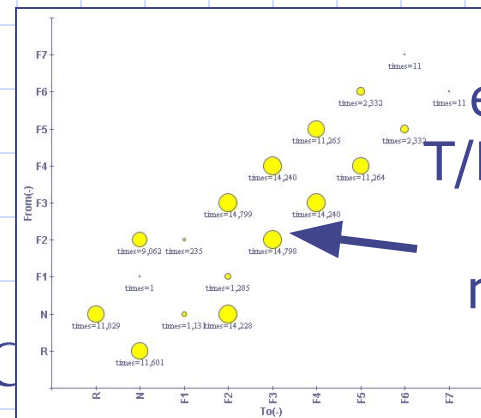

ex. Maximum exhaust temp can be confirm if combustion is normal or not.

ex. Max Blow-by pressure can be found condition of internal parts wear

## (1) SMR

## (4) Load Map

ex. Frequency of T/M shift changing can be seen the machine severity and abuse.

## (2) Error Code

| 順 | 発生時刻                | SMR    | エラーコード | 内容                     | 復帰時刻                | 対象コントロール     | スナップショット | 件数 |
|---|---------------------|--------|--------|------------------------|---------------------|--------------|----------|----|

# VHMS Machines (Komatsu Japan product)

|           | Policy of VHMS Application | Model       | VHMS                                 | Requirement of next generation model |
|-----------|----------------------------|-------------|--------------------------------------|--------------------------------------|
| Dozer     | D375 class and up          | D375-5      | Option                               | STD from Tier3                       |
|           |                            | D475A-5     | STD (Less Option)                    | STD                                  |
| Excavator | PC1250 class and up        | PC1250-7    | Option                               | STD from Tier3                       |
|           |                            | PC1800-3    | STD                                  | STD                                  |
| Loader    | WA600 class and up         | WA600-3     | N/A                                  | STD from Tier2/3                     |
|           |                            | WA700-3     | Option                               | STD                                  |
|           |                            | WA800/900-3 | Under development<br>( - 2005/April) | STD from Tier2                       |
|           |                            | WA1200-3    | STD                                  | STD                                  |
| Truck     | HD465 class and up         | HD465/605-7 | Option                               | STD from Tier3                       |
|           |                            | HD785/985-5 | Option                               | STD from Tier2                       |

## VHMS & Orbcomm

|           | VHMS | Orbcomm                 |
|-----------|------|-------------------------|
| Japan     | STD  | OPT (R&M:STD)           |
| USA       | STD  | OPT → STD               |
| Australia | STD  | OPT (Not yet available) |
| Europe    | OPT  | OPT                     |
| Asia      | STD  | OPT (Not yet available) |
|           | ⋮    | ⋮                       |
|           | ⋮    | ⋮                       |

**Komatsu Ltd policy is all machines should be equipped with VHMS as standard.**

**We strongly recommend you to adopt VHMS as standard and Orbcomm if they are available.**

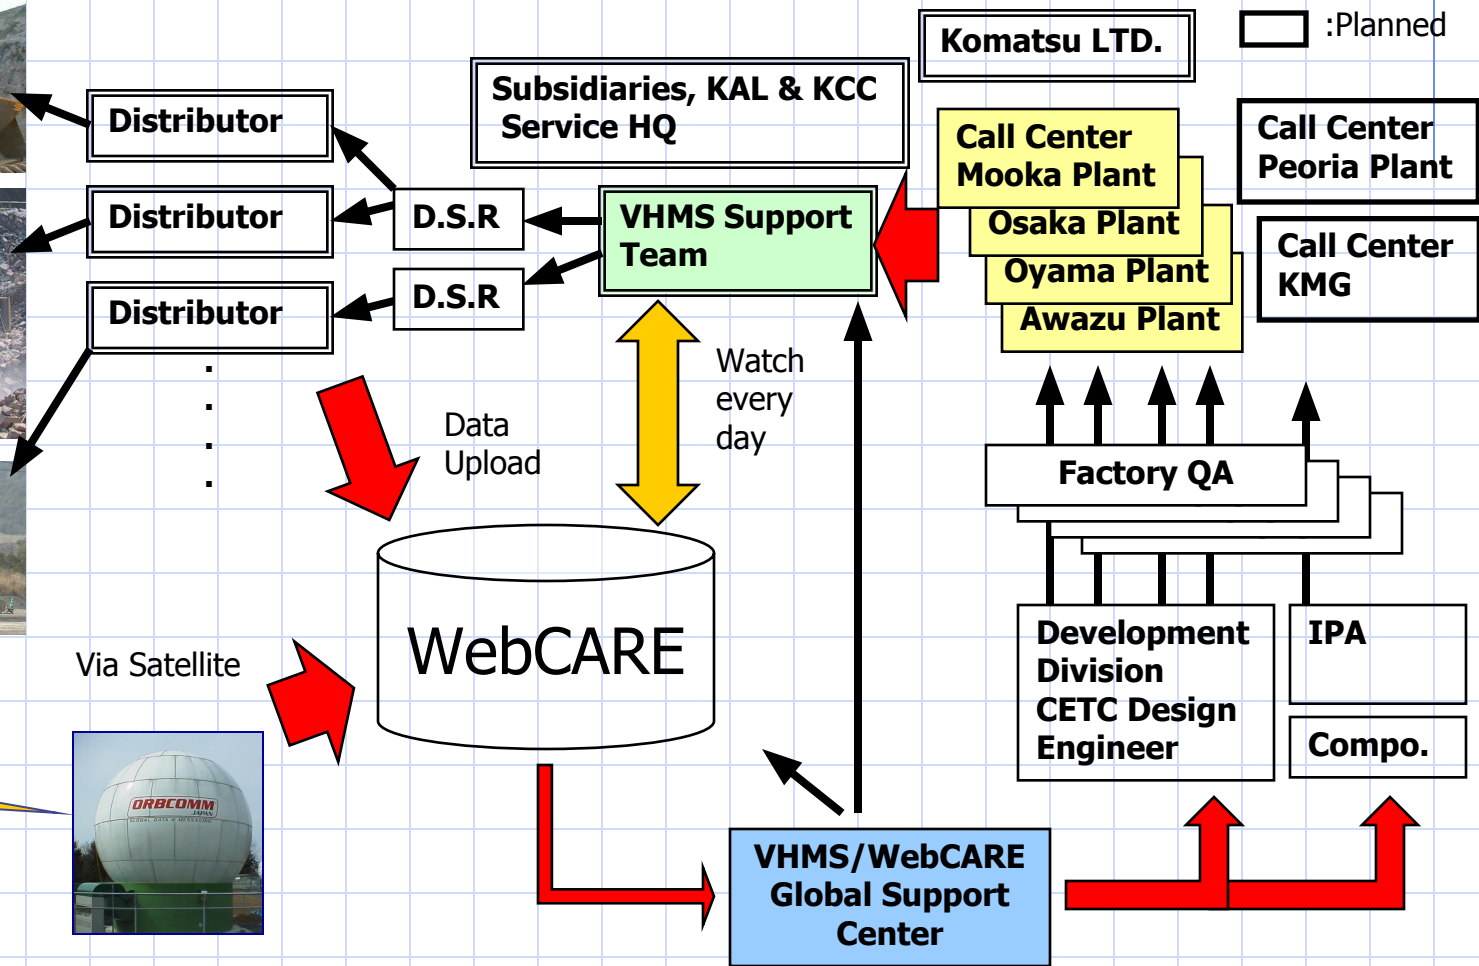

# Global Support System

Job site

KAC VHMS Support Team watch WebCARE every day. When abnormality occurs, Call centers supports KAI.

Via Satellite
