

GM-foods

**Would you like  
to eat  
GM tomato?**

**We live in a world, where people don't think about foods that they eat.**

**It is terrible to imagine what do our sausages include and who did raise our**

**We can see GM - foods on shops.  
But what is it? GM-foods are  
things made by scientists by  
introduction of genes from**

against

Lets make some interrogation. Most of us believe that GM is ... and .... Only ... person thinks that it is .... And ... students have no interest on it.

---

Scientists believe that GM-foods are very harmful. They proved it on experiment. These foods can cause of different diseases like allergy or infertility.

---

Also they can make mutations and even kill organisms. For example, a rat, that ate such food, had no children and hadn't long life.

You asked: “Would you like to eat GM-tomato?”. I wouldn't. I want to live and have a good health.

**In conclusion I should say: GM – foods are dangerous. If you want to be healthy and happy try to beware of them. Let's go to eat useful food.**
