

*«The English language is your most versatile scientific instrument.
Learn to use it with precision.»*

Nuclear English

Nuclear English is proposed by Randolph Quirk, but never fully developed.

- ❖ *R. Quirk is a British linguist and life peer. He was the Quain Professor of English language and literature at University College London from 1968 to 1981.*

English is regarded as the richest of the world's languages. Its vocabulary includes at least one million words.

Nuclear English is a completely new course designed for English language learner's working in the nuclear industry and other fields of nuclear science and technology.
