Iryna Ilchenko

Form:9-B

Dolynska gymnasium

Teacher: Sheremet Tatiana

VOCABULARY

by-product – побічний продукт

harmful substances – шкідливі речовини

dust – пил

vast – широкий

upset – порушувати

measures – заходи

security – безпека

burning – гострий

appear – з'являтися

disappear – зникати

Environment protection

Environment protection

The protection of environment has become one of the most burning problems of our century.

Large cities with thousands of smoky industrial enterprises appear all over the World today. The by-products of their activity pollute the air we breathe the water we drink.

Every year the world industry pollutes the atmosphere with about 1000 million tons of dust and other harmful substances.

Vast forests are cut. Their disappearance upsets the oxygen balance .

As a result some rare species of animals, birds , fish and plants disappear forever

Environmental protection is a global problem. That is why the most serious measures to create a universal system of ecological security should be taken. The activity of various environmental organizations help to improve the situation. Among them are the Greenpeace and The Green Party.

If we are unable to learn to use the environment carefully and to protect it from destructive man's activities ,very soon we'll have no world to live in.

The end !
