Switzerland

- I like Switzerland very much. Switzerland's culture, Switzerland's Watches and Banks, Sights and monuments of Switzerland. I believe that Switzerland is a very beautiful and amazing country. I have never been there, but I heard that there are very kind , cultured and polite people.
- Switzerland or the official name of the Swiss Confederation is a small country that is located in central Europe. In the north, Switzerland has a common border with Germany, in the South it borders on Italy, in the west it borders on France, and on the east with Liechtenstein and Austria. Switzerland has no access to the sea, it is hidden deep in the continent.

Culture of Switzerland

- The country is rich in many castles and houses that were built by rich and noble people. Ancient castles and manors of Switzerland are real architectural treasures, many of which are exact copies of the houses of European aristocrats. The ancient castles of Switzerland are located in the most beautiful places surrounded by fragrant gardens. It is these castles that are described by many writers in fairy tales and various stories. Most visitors are attracted by the castle of Walrus and the castle of Chillon. Not less famous castles can be called Schloss Thun, Castle Gruyer, Schloss Tarasp, Schloss Sargane and Castelgrande. Almost all of these castles are open for visits, as they contain museums, restaurants and hotels.

Swiss Hours and Banks

- If we talked about Switzerland, how can I not mention their famous watches and banks. The first quartz watches were invented in Switzerland, but after some time, some Swiss firms returned to the mechanics, improving the models with the accuracy inherent in the Swiss. Today, a person has Swiss watches of elite brands: Breguet, Patek Philippe, Vacheron Constantin, Blancpain, Audemars Piguet, A.Lange & Sohne, IWC, Jaeger-LeCoultre, Panerai, Chopard, Cartier, Oris, etc. Is an indicator of his material and social status. A separate line in the whole world is talking about Swiss banks, accounts in which are available to everyone. Undoubtedly, the high-sounding name "Swiss Bank", received by banks due to the fact that accounts in Swiss banks were opened by millionaires, criminals and various officials for concealing the money they earned dishonestly. Also, Swiss banks are loved by many celebrities who hide their savings and assets from their spouses in them.

Sights and monuments of Switzerland

- Switzerland can be called a classic tourist country, in which all the greatness of nature is concentrated, and unique monuments of architecture. The beginning of tourism in Switzerland was laid by the British, who were attracted by mountain peaks. In order to experience climate contrasts, tourists do not have to make multi-day trips. In Switzerland, in this small country, you can feel such changes literally in 2-3 hours.
- I hope that in the future I will visit this beautiful country, and I will tell a lot of new things!
