

The background features abstract, overlapping green geometric shapes in various shades, primarily on the left and right sides, framing a central white area. The shapes include triangles and polygons, creating a modern, layered effect.

ECOLOGICAL PROBLEMS

The main problems are:

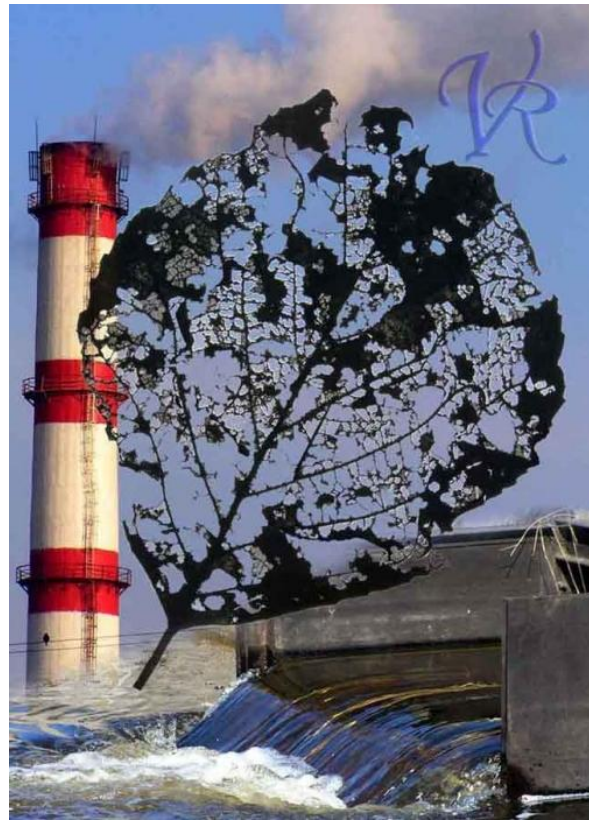

The earth

Water is necessary for our life. all organisms contain it, some drink it and some live in it.

Air is the most essential element for all living. but people play a big role on it`s polluting. Asthma, cancer, acid rains are only a few causes of air pollution.

Land is our home. but our home is in a big trouble and needs “first aid”. The land is very dirty. it is full of litter.

Ozone layer is a protecting layer of our planet. It protects us from UV and other high radiation. But Ozone layer has holes.

the planet without ozone layer

Global warming is sometimes referred as the greenhouse effect. It means that atmosphere becomes warmer.

There are many different groups which try to find solutions to the problems of pollution at the national and international level.

National parks play a big role in protecting the nature

Protect and save the nature!!!

- ▶ Remember the three R`s: reduce, reuse, recycle!!!!
- ▶ Put your litter in the bin!!!
- ▶ Never cut down baby trees!!!
- ▶ Don`t hurt animals!!!
- ▶ Protect wildlife, plants and trees!!!
- ▶ Feed birds in winter!!!
- ▶ Plant trees and flowers!!!

The world day of water

The world
day of
health

The international day of birds

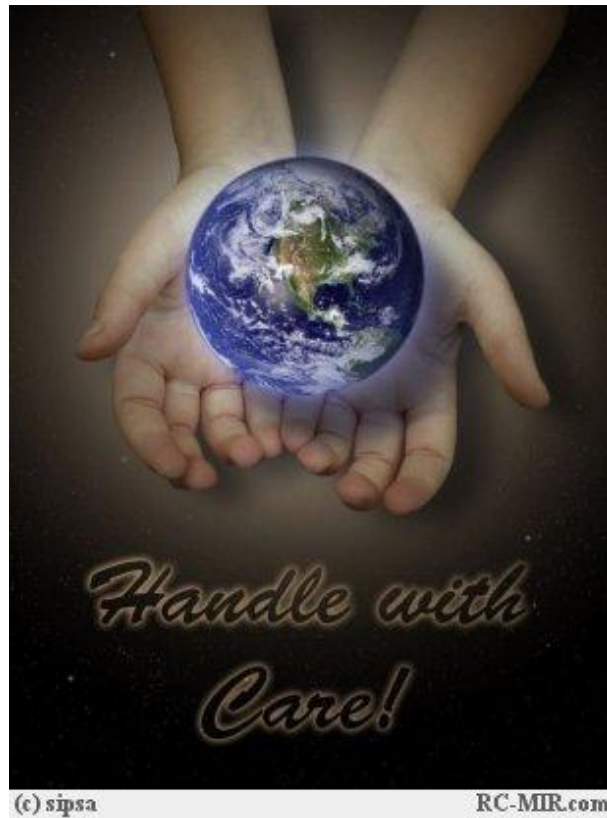

The world day of the Earth

The world
day of
environmen
t protection

*Be a friend to the
nature!!!*

The End
