

# LONDON UNDERGROUND

# The London Underground was the first city underground, in

# There are more than 280 1 stations

**The Underground has more than 280 stations and around 400 km (250 miles) of track, making it the longest metro system in the world by route length. It also has one of the highest number of stations. More than one billion passenger journeys were recorded, making it the third busiest metro system in Europe after Paris and**

**Moscow**

The London Underground's 11 lines are the Bakerloo line, Central line, Circle line, District line, Hammersmith & line, Jubilee line, Metropolitan line, Northern line, Piccadilly line, Victoria line and

*The London Underground map has a classic 20<sup>th</sup> century design with a great history of its own. Although it was designed in the 1930s the original is still used today with modifications. Harry Beck, the designer of the map.*

**Harry Beck**

Someone has actually designed "The Way Out" tube map which is a pretty useful invention, since it shows where all the nearest exits are when you reach a station, allowing

The

**Way out →**

Tube Map

Being told where to get off can sometimes be a pain, but not with the **Way out →** map.

Its clever, easy to use system shows you which carriage to board to arrive right opposite the platform exit at your destination.

This ingenious **Way out →** map will put you a lot more than one step ahead.

**The shortest escalator on the system has 50 steps. All the escalators do the equivalent of two round the world trips every weeks.**

**The  
end!**
