

Gludie muskuļi

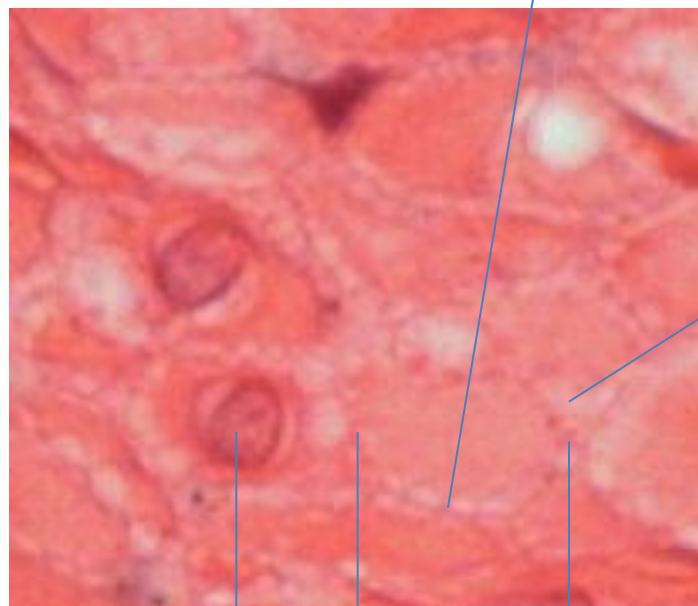

Pazīmes:

- Šūnām nosmailināti gali, $l=30$ iedaļas, $d=4$ iedaļas
- Vārpstveida kodols šūnas centrā, $l=8$, $d=3$
- Blīvie ķermenīši (BK_s)
- Blīvās plātnītes (BP)
- Irdenie saistaudi starp šūnām (IS)
- Šūnu savienotas laterāli un proksimāli-distāli.

Pazīmes:

- Svītrojums perpendikulāri šūnas garenasij
 - Eliptisks kodols šūnas centrā
 - Šūnas sazarojās
 - Starpdiski
- a) Distālie un proksimālie gali,
b) Laterāli savienojumi
- Starp šūnām ir denie saistaudi
