Each language is very important for your country, but if you know foreign languages, then you have a better chance of getting a job and just knowing the languages is very pleasant.

But of all languages, English is the first.

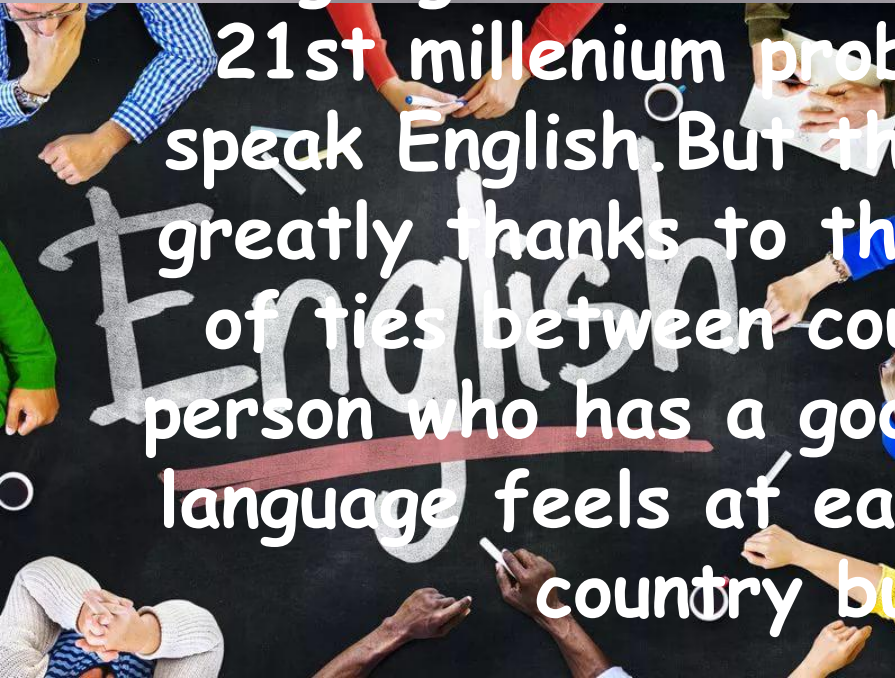

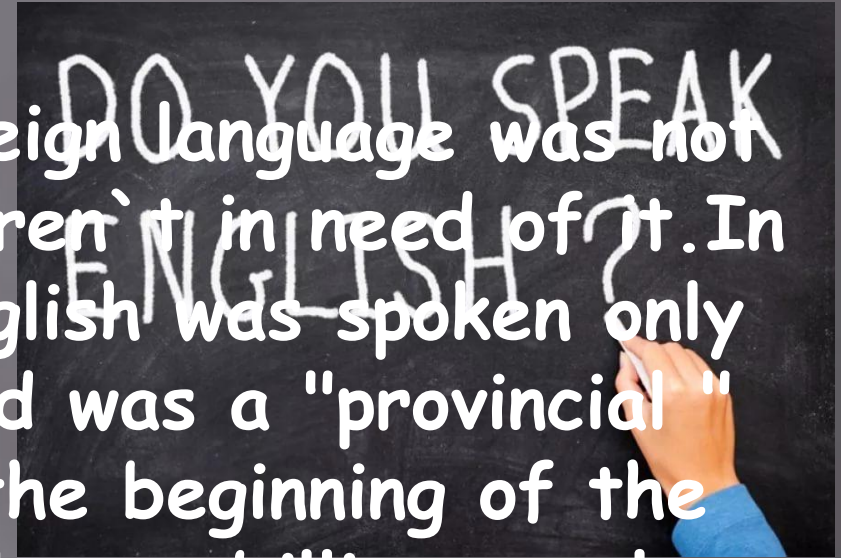

Therefore, if you study it, then:

- 
- English is the international language. English occupies the leading position among such languages as Chinese, Spanish, Arabic and French are official languages at the United Nations.
 - the Need to place of residence, in the work.
 - A lot of people travel abroad.
 - English is taught as a foreign language in many schools around the world.

We learn in school by the book
M.Z. Biboletova:

Long ago studying a foreign language was not necessary and people weren't in need of it. In Shakespeare's time English was spoken only by six million people and was a "provincial" language. But now at the beginning of the

21st millennium probably one billion people speak English. But the situation has changed greatly thanks to the expansion of all types of ties between countries in the world. A person who has a good command of a foreign language feels at ease not only in his native country but abroad too.

I LOVE
ENGLISH
