

Life in Russia 50 years ago

By Pogorelov Bogdan

Fifty years ago people lived in wooden and brick houses.

Fifty years ago there was central heating in flats, but it was not in wooden houses.

Also there were electricity and running water.

People took water from wells and cooked food in ovens.

There were no vacuum cleaners, people swept the floor with the broom.

There were no big LCD TV with more than hundred channels, only small TV sets with water lenses.

Also there was no big modern refrigerator. It was small and very noisy.

Furniture was not very comfortable, but qualitative.

Now there are all modern conveniences and equipment our flats.

Computers, gas stoves, washing machines, telephones and others make our life easier and more interesting.
