

Slide Design

Background colors
-Don't be too creative

Colors

- Good contrast is important
 - Yellow on dark blue
 - Black on white
 - White on black
- Be aware that colors may look different on the screen

YELLOW

BLACK

WHITE

Colors may look different on
the screen

Colors

- You can use colors to emphasize a point, but do it occasionally

Using a color as a decoration is distracting

Using different colors for different points is not advisable

COLORS

- Do not use red and green as a combination
- Do not use distracting background
- Do not use colors that are not good contrast

Specifičnosti intenzivne terapije pacijenata sa HOBP

- Dobro tolerišu loše GAK
- U proceni potrebe za mehaničkom ventilacijom gledati prvenstveno stanje pacijenta (npr da li može normalno da priča) a ne loše GAK
- Cilj u korekciji GAK je PaO_2 veće od 60mmHG a saturacija O_2 veća od 90%
- Kod pacijenata sa hroničnom hiperkapnijom stimulus za disanje postaje hipoksija te nebi trebali davati veliku koncentraciju O_2 zbog mogućeg prestanka disanja.
- Za procenu takvih pacijenata pogledati bikarbonate u GAK (ako su veći od 30mmol/l onda postoji jedino hipoksičan nadražaj respiratornog centra

Text on slides

- 1.No more than five lines
- 2.About six words per line
- 3.Use only key words and phrases
- 4.Do not use whole sentences
- 5.Less is more!

Fonts

- Be sure that everybody can read it
- Try to make 28 the smallest
- Use different sizes for main and secondary points
- Again be sure it is not too small

Typography for doctors

Sans serif for headings

I I

You can use sans serif font for headings
(Arial), and serif (Times new roman) for body
text

Serif for longer phrases and short sentences

Fonts

Not more than two fonts *per slide*

- DO NOT USE ALL CAPITALS
- Never underline
- For emphasize use *Italic* or **bold**

Keep your color schemes simple and traditional, and never use red unless you have something to hide.

What was wrong with that slide?

Don't use **RED** color to emphasize
text

PICTURES (Photographs) ON THE SLIDE

Don't do this!

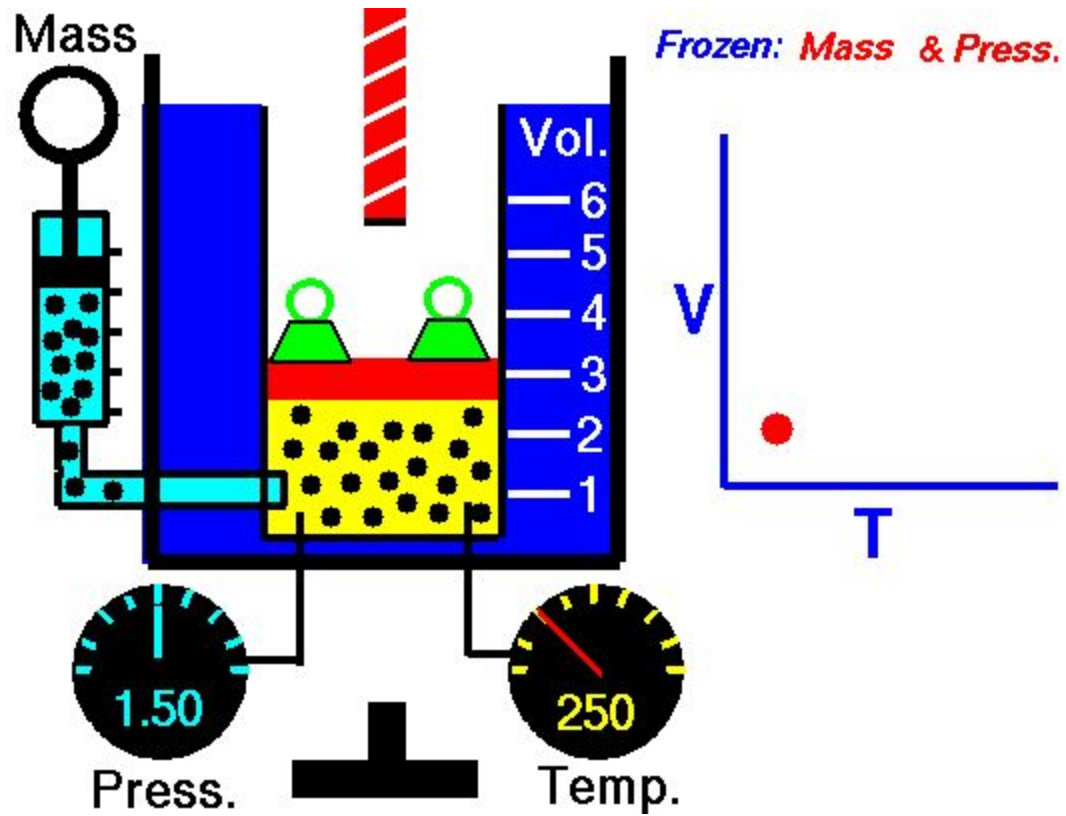

PATIENT

PREPARATION

Animation

Animations

- Use sparingly, for emphasizing points
- Useful to bring one point at the time
- It can be distraction
