

We are killing nature

Prepared by the students of
class 8b

Alexei Novikov

Beloglazov Maxim

- It's a wonderful world we live in. For thousands of years the Earth has given support to all forms of life - human beings, animals, birds, fishes, insects and plants

- Many species of animals and birds have disappeared. Millions of animals die every year because man has polluted their natural homes. Besides, every year people cut down more trees, build more roads, and use more land for farming. This leaves fewer jungles, fields and forests for wildlife.

- The country air, once clean and fresh, now may be polluted by power by stations and factories. Some of our rivers are now empty of fish. And in some rivers you can even see a thick foam caused by chemical waste.

● Thank you for your attention!
