mSeating Module Design

mSeating modules are designed to be used individually and to form groups. Consisting of three different modules, mS (mSeating1, mSeating2, mSeating3) is suitable for personalization with complementary negative forms and different color options.

2017

oLive Glass Label

An innovative bottle design was requested in order to brand Turkish olive oil, which is unknown due to lack of promotion and branding, in the global market at the guest contest opened by the company and where seven designs competed.

2018

cChocolate Box

It was opportunity that the gift chocolate market in the premium segment was niche, limited access to products and therefore a very limited audience was reached, and the chocolate offered for sale in the markets was aimed to reach a wider audience.

Bio.

Hello!

I'm a Central Asia (Kyrgyzstan) based graphic designer and architect. I was a kid my father send me to printing office to learn how to use computer and design. Later I apply private high school in Kyrgyzstan. It was not about graphic design but everything. They teach me Turkish and English language. When I finished my private high school I got into university in Turkey. I was studying Electrical engineering in İstanbul Technical University but I wasn't sure if this departure is fits to me. Everyday playing my guitar and watching some design awards. After 3 years, I decided to switch to architecture.

Studying architecture was exciting to me because it is all about design. By learning architecture I started to work graphic design agency (Renklam Creative). Now I'm a 4 years old in Architecture and 6 years old on Graphic Design.

Branding, Printing

Since my client's wife was a good cook, she decided to open a restaurant. We started to talk about how this job will be. They choose me from many agencies and freelancers. They were a little hesitant at first but I made a nice logo design by giving confidence to my client. My customer's wife wanted the logo to be a more food icon and I prepared the design accordingly. The logo has been revised twice. Between various of logos they choose green and orange one. After the logo work was done, I created a corporate identity for them. They agreed without any revision. I prepared tents, napkins, placemats, pens, business cards and many other products in corporate identity. I also prepared the printing works of these products that I made for Vaveylas. I also prepared the sign on the exterior of the restaurant close to its opening. I started preparing flyers and menus to advertise the restaurant.

At the moment, vaveylas continues to satisfy its customers and I continue to work with them. Thank you Vaveylas for choosing me.

In this project, I will talk about my work for a boutique olive oil producer. Coşkun Zeytincilik has been an olive oil producer for years. Every product they produce is of high quality. I can understand because I love olive oil very much. If I were to describe my work, I first started with a new logo design, at the logo stage, I made a boutique logo design based on the olive tree. After three revisions, I completed the logo. Then I made a business card, craft bag and many other requests. I prepared social media designs. The website of Coşkun Olives has been renewed (www.coskunzeytincilik.com), I have a big role in website design. There have online sales every day.

After the website design was finished, I started designing to renew its labels. After a many effort, I handed over the labels. I am very pleased to work with Coşkun Olive.

Saribas is the project I have been working on the most. I used to work for Saribas every day. I made social media, billboard, brochure, photo shoots and so on. Saribas cheeses and olives are delicious. They would give me cheese and olives every day. I liked Saribas very much because I did a lot of work. I helped him build online sites. I made product shots. I prepared the social media posts myself. He has had a lot of online sales and said he will open a new branch. I started to make lists of interior decorations and necessary materials for the new branch. I made the designs and delivered them. In Balikesir Saribas is known as the first cheese maker. Everybody knows Saribas as quality product maker. I still provide design services to them. I am proud to work with them.
