Our story

📍 Based in Barcelona & London

We are AI experts specialising in fashion, passionate about delivering a truly personalized shopping experience to online shoppers within seconds, operated by our utterly unique machine learning algorithm combined with our image consultants expertise.

The Style Lab team is made up of image consultants and fashion experts from YOOX NET-A-PORTER GROUP, Farfetch, and top data scientists from Google and Intel.

We offer several types of services which can be tailored to your customers needs.

Our Research

Our four-year in-depth research highlights the challenges consumers have faced when shopping online.

Shop online at least once a month, but struggle to make a choice and complete their purchase.

Consider it important to buy clothes that align with their style.

Do not know what to wear with items they have purchased previously.

Would like to receive personalized recommendations whilst shopping online.

Our Services

With various options to choose from, our services are carefully tailored to meet your customers' needs and elevate their shopping experience within seconds.

PERSONAL STYLE

START NOW

Our expert style guide reveals the perfect cuts, textures and prints tailored to every customer.

COLOR ANALYSIS

START NOW

It all starts with one selfie. Our smart science analyzes customer's skin tone to make tailored clothing recommendations that best suit them.

Cold Winter

Our commitment to sustainability Style Lab's input

Sustainability is at the core of our ethos. We are on a mission to help our partners unlock their sustainability goals by delivering exceptional service to their customers, without costing the Earth.

Our AI systems help consumers re-style and breathe new life into their wardrobes. By linking new items from your website with our matching service, fresh styling ideas prevent clothing going to landfill. Alongside this service, Style Lab reduces the returns tenfold. It's backed by our science.

Challenge

Anna (24) has a work Christmas party coming up and wants to feel confident, look professional yet glam.

Anna's already got an existing top in her wardrobe she wants to wear but she doesn't know how to style it.

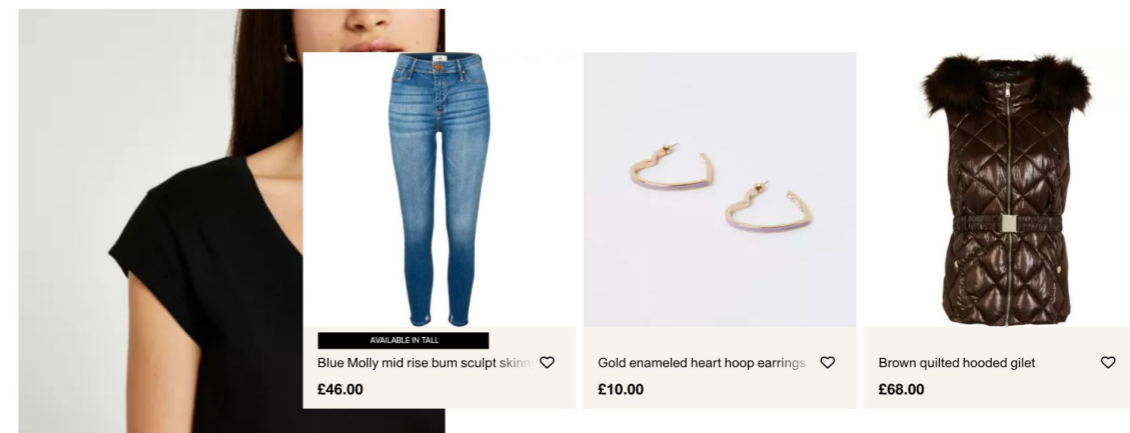

Solution

Style²Lab

Based on Anna's previous shopping choices and appearance, our AI technology service would create numerous head-to-toe style recommendations. Our app would provide Anna with all the options on your website that would complement the item that she uploaded from her wardrobe.

Challenge

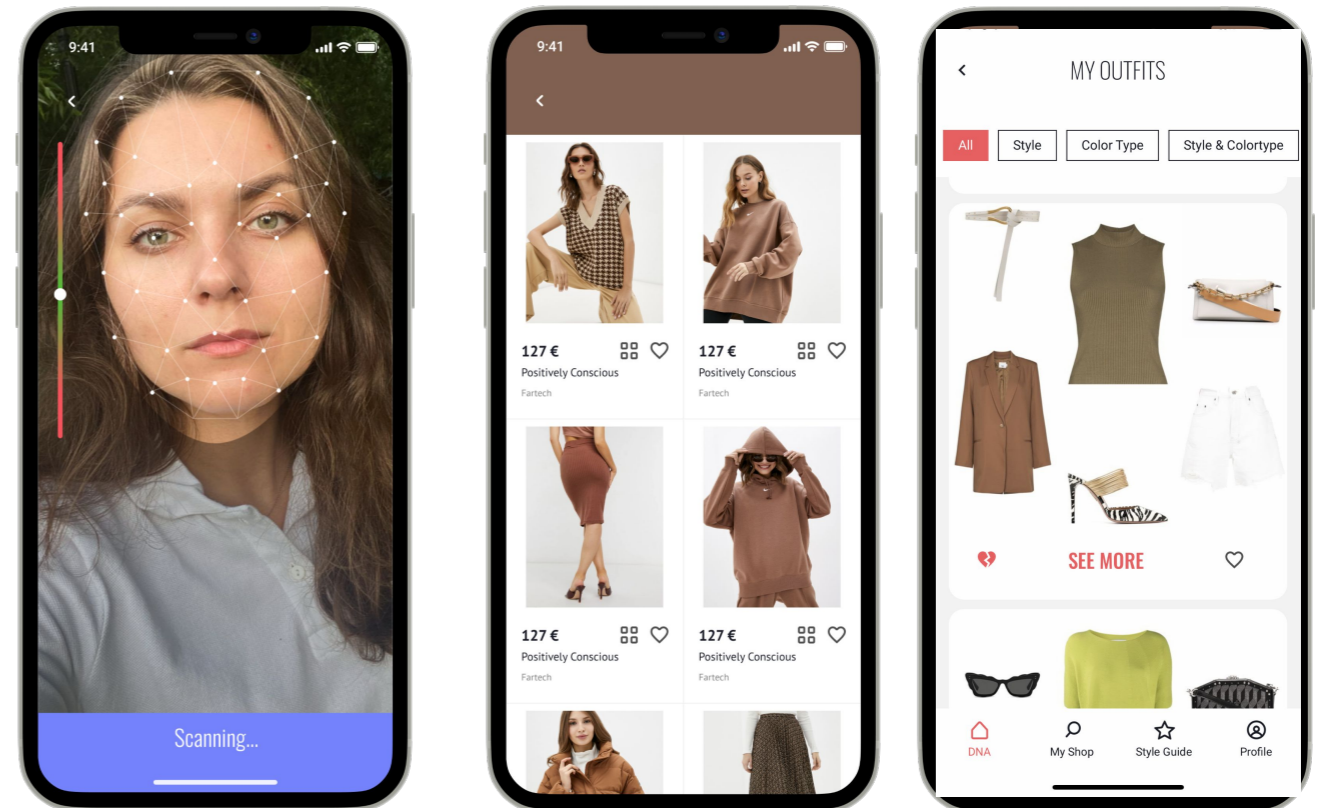

Lisa (36) is a new mum and on maternity leave.

She has now hit her target post-baby weight - and wants to feel confident again - but has less time to focus on herself now.

Lisa wants to find clothing recommendations to suit her style, but doesn't know where to begin.

Solution

Based on Lisa's colour and personal style analysis, our AI technology would create head-to-toe style recommendations, collating your website items to give Lisa a personal shopper in-store experience within the online world.

Benefits of partnering with us

We use tailor-made solutions and adjust our tech to each client's needs.

Personal Shopping

The screenshot shows the Lone Design Club website. At the top is the logo 'LDC. LONE DESIGN CLUB' with the tagline 'WHERE INDEPENDENT BRANDS + CONSCIOUS SHOPPERS MEET'. Below the logo is a navigation menu with categories: WOMEN, MEN, BEAUTY + HOME, DESIGNERS, DISCOVER, EXPERIENCE, and ABOUT LDC. The main heading is 'PERSONAL SHOPPING WITH LONE DESIGN CLUB' with a sub-heading 'Shop The Club with the help of our very own LDC Brand Curators'. Below this are four images: a woman in a patterned dress, a black handbag, a woman in a zebra-print coat, and a hand holding a ring. A text block describes the personal shopping service, mentioning one-on-one styling sessions and group parties. Below the text is a black button that says 'CLICK HERE TO FILL OUT THE PERSONAL STYLE QUESTIONNAIRE ►'. Further down, there are two more black buttons: 'ONE - ONE PERSONAL SHOPPING SESSION' and 'GROUP PERSONAL SHOPPING PARTY'. At the bottom is a large white box with a black border that says 'JOIN THE CLUB' in large bold letters, followed by 'GET FIRST ACCESS TO NEW DROPS, MEET THE DESIGNERS + CHAT LIVE, EXCLUSIVE ONE OFFS, ON THE SPOT DISCOUNTS + MORE.' in smaller text.

Opportunity:

Enable chatbot on homepage to offer a more personalized service and pre-screen clients before they reach personal shoppers.

The chatbot journey can include logic to suggest a personal shopping session with a live stylist in order to promote the service.

Services

Style & Color Type

With various options to choose from, our service is carefully tailored to meet your customers' needs and elevate their shopping experience.

STYLE PROFILE

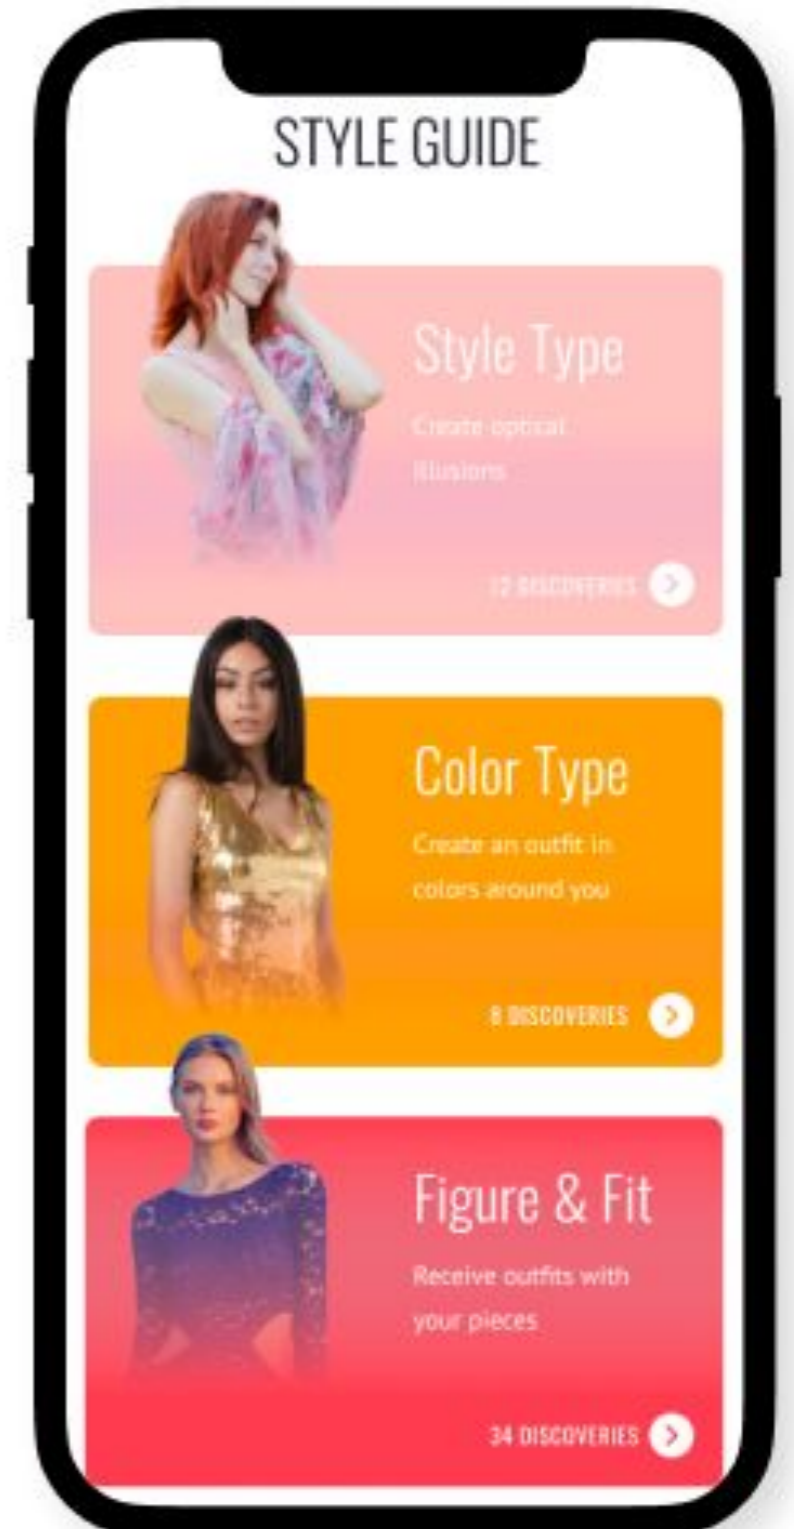

Our AI identifies colors, shapes, fabrics and patterns that match your customer's complexion and facial features.

PERSONALIZED EXPERIENCE

DNA Style users appreciate the efficiency and convenience of the service, as we lessen the time they spend searching for looks that may not work for them.

CURATION

We provide personal recommendations based on the customer's style profile, curating outfits that are uniquely tailored to the individual.

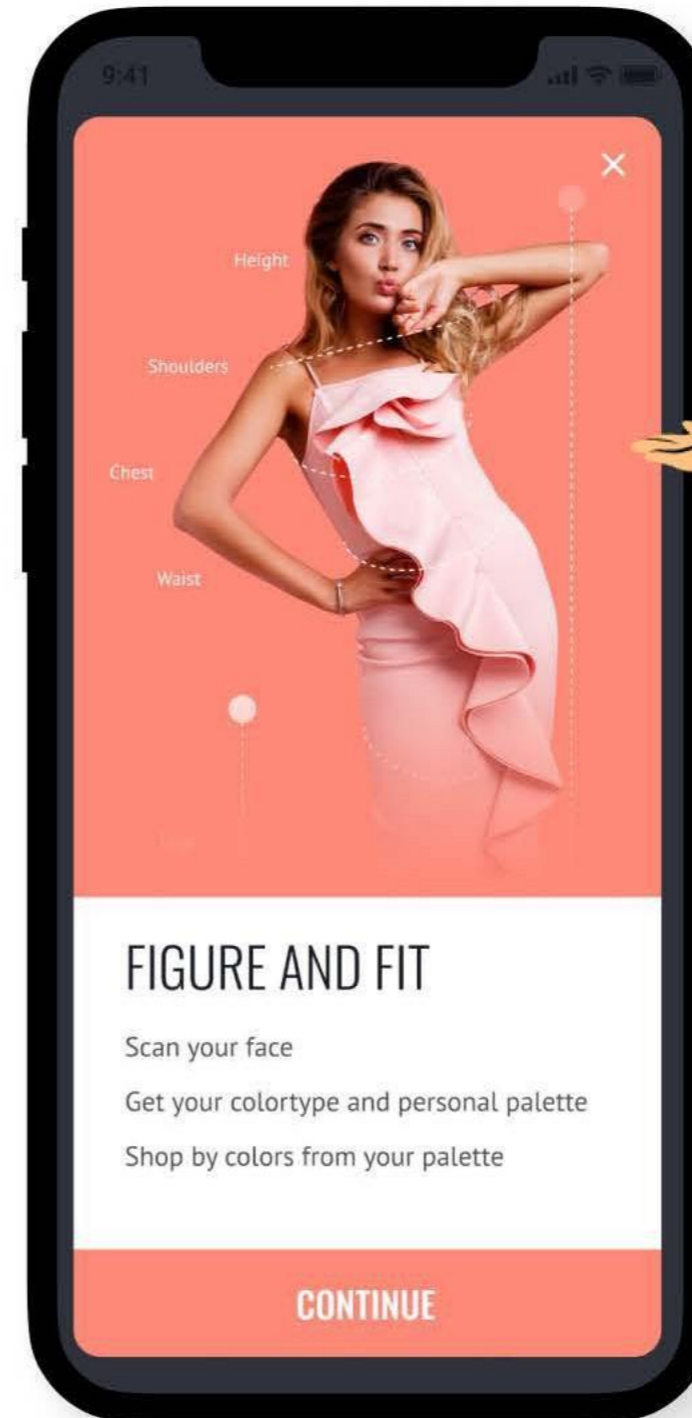

Services

Figure & Fit

Based on the customer's body type, **our algorithm suggests the most flattering items in terms of figure and fit.**

We have mastered personalization at scale and designed a seamless shopping experience by **bridging the gap between the online and in-store.**

Our personal styling solution delivers exceptional experience and value for your customers, **enabling them to make informed choices** and learn as they shop.

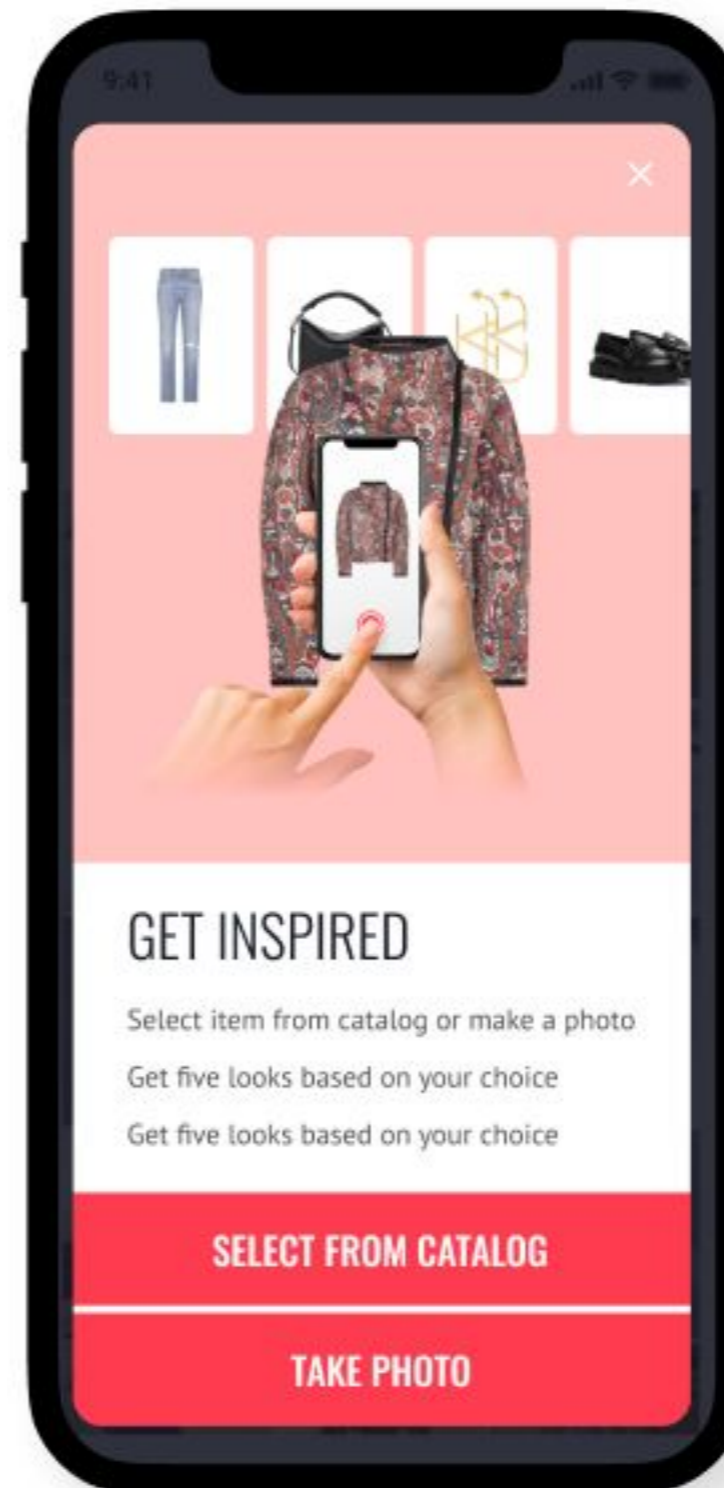

Services

Outfit Builder

Customers can upload an image from their own closet or choose any item from your shopping catalog to receive advice on how to style it.

Our AI will combine up to 5 head-to-toe outfits with any items that they upload.

This gamified experience will help you increase customer loyalty and engagement, as well as achieve your sustainability goals.

Benefits of working with us

We use tailor-made solutions and adjust our tech to each client's needs.

SEAMLESS INTEGRATION

FLEXIBILITY AND HYPER-PERSONALIZATION
