

TOP OF RUSSIAN CULTURE CHARACTERISTICS

Yulia Ishmatova

1. Russian people like to argue on various issues, both private and General

2.To fight, and then drink vodka together and literally fall in love with another recent opponent — this is our way. Fighting is the highest form of solving interpersonal conflicts, and if it is already passed, there is nothing to divide.

3. When the bags are already Packed, we usually pause to sit quietly for a minute before the trip. Many do not like this tradition, considering it a relic of paganism, but this "minute" simply gives a respite in the turmoil of collecting

4. Only the laziest Russian person will say a simple toast "To health" or something like that. We just have something to say, so we always say long toasts

5. We can tell a story and in the middle say, " Oh! It's like in that joke...", and we will definitely tell it. Although no one asks us to

6. Although according to the rules you need to wish each other a light steam before the bath, we say: "With light steam!" only after a bath or shower. It used to be a spell. It was supposed to protect the washing from the machinations of a brownie living in a bath.

7. "How are you?» For foreigners, it is customary to answer this question with the usual "Good, thank you!". It's not like that with us. Because "good" or " bad " are unambiguous concepts. Our people know that there is nothing unambiguous in life

8. Every normal Russian app
has a package with packages.
