# Progress Bars

Progress bar(indikator) foydalanuvchiga jarayonning davomiyligini ko'rsatish uchun ishlatiladi.

Odatiy rivojlanish progress barni yaratish uchun .progress sinfini konteyner elementiga va .progress-bar sinfini uning pastki elementiga qo'shing. Progress barning kengligini o'zgartirish uchun CSS width xususiyatidan foydalaning:

```
<div class="progress">  
  <div class="progress-bar" style="width:70%"></div>  
</div>
```

# Progress Bar Height

Progress barning odatda 16px balandlikka ega bo'ladi. Uni o'zgartirish uchun CSS ning height xususiyatidan foydalanish kerak. Shuni esda tutingki, progress br containeri va progress barning o'zi uchun bir xil balandlikni o'rnatishingiz kerak:

```
<div class="progress" style="height:20px">  
  <div class="progress-bar" style="width:40%;height:20px"></div>  
</div>
```

# Progress Bar Labels

Foizni ko'rsatish uchun progress barga matn qo'shing:

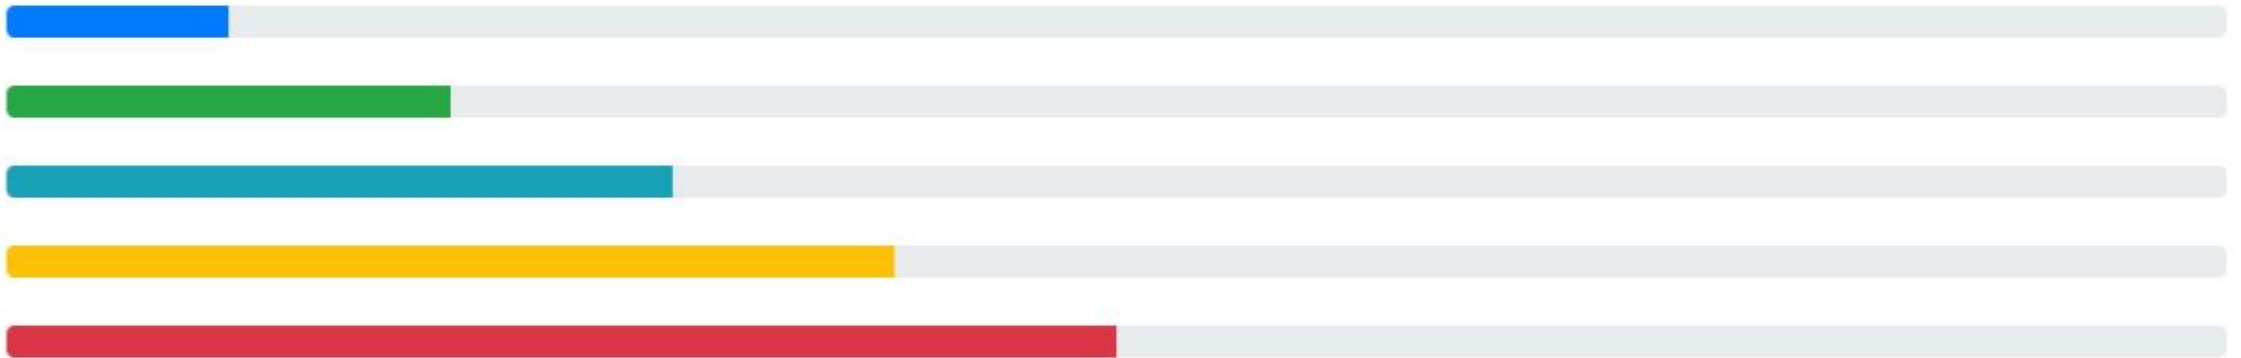

```
<div class="progress">  
  <div class="progress-bar" style="width:70%">70%</div>  
</div>
```

# Progress Bar Labels

## Savol:

Qanday qilib progress bar ning rangini boshqa ranglarga o'zgartirishimiz mumkin?

# Progress Bar Labels

## Yechim:

```
<!-- Green -->  
<div class="progress">  
  <div class="progress-bar bg-success" style="width:20%"></div>  
</div><br>  
  
<!-- Turquoise -->  
<div class="progress">  
  <div class="progress-bar bg-info" style="width:30%"></div>  
</div><br>
```

# Animated Progress Bar

Progress barga animatsiya berish uchun `.progress-bar-  
animated` sinfini qo'shing:

```
<div class="progress-bar progress-bar-striped progress-bar-animated" style="width:40%"></div>
```

# Striped Progress Bars

Progress barga chiziqlar (stripes) berish uchun `.progress-bar-striped` sinfini qo'shing:

```
<div class="progress">  
  <div class="progress-bar progress-bar-striped" style="width:40%"></div>  
</div>
```

# Animated Progress Bar

## Savol:

Qanday qilib aynan pastdagi rasmdagiga o'xshagan progress barni hosil qilishimiz mumkin?

# Progress Bar Labels

## Yechim:

```
<div class="container">
  <h2>Multiple Progress Bars</h2>
  <div class="progress" style="height:40px;">
    <div class="progress-bar bg-success" style="width:40%;height:40px;font-size:18px;">
      Free Space
    </div>
    <div class="progress-bar bg-warning" style="width:10%;height:40px;font-size:18px;">
      Warning
    </div>
    <div class="progress-bar bg-danger" style="width:20%; height:40px;font-size:18px;">
      Danger
    </div>
  </div>
</div>
```

Free Space

Warning

Danger

# Bootstrap 4 Pagination

Agarda bzi judayam ko'p sahifalarga ega vebsahifa yaratishimiz zarur bo'lsa, biz har bir sahifamizga pagination(sahifalash) qo'shishimizga to'g'ri keladi.

Oddiy pagination hosil qilish uchun, `<ul>` elementga `.pagination` classini qo'shamiz. Keyin har bir `<li>` itemga `.page-item` va `.page-link` classlarini qo'shamiz:

```
<ul class="pagination">
  <li class="page-item"><a class="page-link" href="#">Previous</a></li>
  <li class="page-item"><a class="page-link" href="#">1</a></li>
  <li class="page-item"><a class="page-link" href="#">2</a></li>
  <li class="page-item"><a class="page-link" href="#">3</a></li>
  <li class="page-item"><a class="page-link" href="#">Next</a></li>
</ul>
```

Previous 1 2 3 Next

# Pagination Active State

`.active` classni qo'shish orqali, biz hozirgi turgan sahifamizni ajratib ko'rsatamiz:

```
<ul class="pagination">
  <li class="page-item"><a class="page-link" href="#">Previous</a></li>
  <li class="page-item"><a class="page-link" href="#">1</a></li>
  <li class="page-item active"><a class="page-link" href="#">2</a></li>
  <li class="page-item"><a class="page-link" href="#">3</a></li>
  <li class="page-item"><a class="page-link" href="#">Next</a></li>
</ul>
```

# Pagination Active State

.disabled classi bosib bo'lmaydigan linklarni hosil qilishda ishlatiladi:

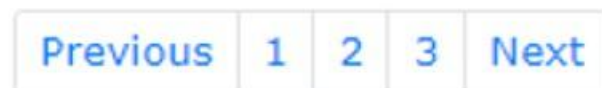

```
<ul class="pagination">  
  <li class="page-item disabled"><a class="page-link" href="#">Previous</a></li>  
  <li class="page-item"><a class="page-link" href="#">1</a></li>  
  <li class="page-item"><a class="page-link" href="#">2</a></li>  
  <li class="page-item"><a class="page-link" href="#">3</a></li>  
  <li class="page-item"><a class="page-link" href="#">Next</a></li>  
</ul>
```

# Pagination Active State

## Savol:

Qanday qilib aynan pastdagi rasmdagiga o'xshagan paginationlarni hosil qilishimiz mumkin?

# Breadcrumbs

Paginationning yana bir boshqa turi bu breadcrumbs. `.breadcrumb` va `.breadcrumb-item` classlari hozirgi turgan sahifamizning sayt xaritasida joylashgan joyini navigatsion panelda ko'rsatib turadi:

```
<ul class="breadcrumb">
  <li class="breadcrumb-item"><a href="#">Photos</a></li>
  <li class="breadcrumb-item"><a href="#">Summer 2017</a></li>
  <li class="breadcrumb-item"><a href="#">Italy</a></li>
  <li class="breadcrumb-item active">Rome</li>
</ul>
```
