

# Wave Sculpture / Candle Brainstorm

# Ideas

- Needs to look like an epic wave but not mechanical, organic
  - Include surface texture (not too choppy, not oil smooth)
- Model should stand alone as if it were to set in front of a table
- Model will be 3D printed and eventually made into a wax mold, appropriate resolution of the spray of the breaking wave will be critical for realism but can't be too fine as it won't print correctly

**DISPATCH: TAVARUA (02)**

*Parko and family enjoy classic Tavarua*

Photos: Scott Winer/[scottwiner.com](http://scottwiner.com)

Note that the water level at the back of the wave is significantly higher than in front, possible a good place for the wick would be behind the wave

The part of the wave that is broken will be critical to get to look right, a lot of spray is not required. The focus of the sculpture should be on the curl and the area to be surfed

# A Frames

- The A frame model looks good but is not as commonly recognized as a surfing wave. Please use these pictures for reference but focus on slides 3-6
