- I want to speak English fluently with my friends. I think I need at least 7-8 months to achieve my goal.
- I want to learn English because it is necessary at work. I am a PE teacher at the university and I have some difficulties in communicating with foreign students.
- I should learn English because it is a global language and everyone knows it. I think it takes 5-6 months to speak it.
- I am having a master in psychology. I am going to work next year. I speak English well but I am going to improve it, because it will make you more desirable to employers. I have watched a lot of English series and movies with much interest and gradually I found myself learning things subconsciously. Now my aim is to get 6.0 in IELTS.
